CHARLES A. GREEN'S NURSERY COMPANY

FRUIT BOOK AND CATALOGUE

ROCHESTER, N. Y.

HOW TO GROW A FRUIT GARDEN

Every one would like to have a fruit garden.

Every man could have a fruit garden if he would take the necessary steps.

Most people have an excuse for not having a fruit garden.

The things necessary are the land and an earnest desire to supply the family with fruit and a willingness to work in the garden, or to employ some person to do the work for you, and the expenditure of \$5 or \$10.00 to pay for plants, vines and trees. Most people have a desire for fruit intending to plant it but they postpone the work which is fatal. Do it now. This is the way to get anything done. Do it to-morrow gets nothing done.

I submit on this page the picture of a fruit garden such as every married man should try to possess. In the background there is a row of apple trees, king of fruit. These can be planted close to the highway by the fence. Have the soil about the roots well mulched with stones or strawy manure. As you face the garden, to the left is a row of plum trees, next to this a row of cherry trees, next a row of dwarf pear trees. In each of these rows may be a few trees of other fruits such as peach, apricot, etc. The next row is devoted to grape vines which can be trained to stakes or a trellis—the trellis best; next to the grapes is a row of black raspberries, next red raspberries, next are blackberries, currants and gooseberries.

Keep this picture of our fruit garden before you when making out your order which I assume you intend to mail to some reliable nurserymen; the picture will aid you in deciding how many trees and plants to buy, and be of assistance to you in planting them. In making out your order do not forget asparagus and the strawberry bed. In the picture the asparagus and strawberry rows are placed between the rows of trees. The idea is to so plant this garden in rows that it may be cultivated with a horse and cultivator the same as corn or potatoes, which greatly lessens the amount of labor and expense. Leave room enough at both the rear and front of these rows of trees and plants so that the horse will have room to turn around in cultivating.

**GREEN'S
NURSERY Co.,**
ESTABLISHED 1870.

Charles A. Green's Letter to His Patrons:

G.N.Co. Has
200 ACRES.
1,000,000 TREES
AND PLANTS.

Dear friend and patron:

It is over 25 years ago since I began to serve my patrons with carefully graded, carefully dug vines, plants and trees.

I take pride in my work during all these years feeling that I have done my patrons good service. I have not only sold them trees etc., which were in good condition for growing, but have also sent out trees that were honestly labeled, each tree or plant being true to name.

You may not realize what it means for a nursery to be able to claim that it labels its trees honestly. There are many nurserymen in this country who are dishonest enough to place wrong labels upon their trees. This fact cannot be discovered until the trees come into bearing. If I had followed this dishonest practice of labeling trees with the name of any variety that a patron might call for I could have saved \$10,000 each year.

I speak of this matter frankly for you should know the sacrifice we have made each year to give our patrons a square deal. Year after year we are expected to meet the competition of dishonest men, who do not care whether the trees they sell live or die, or whether they are true to name or falsely labeled. This is not fair competition.

There is satisfaction in the feeling I have that the products I have sold during the past 25 years have brightened a hundred thousand homes and have added to the revenues of many worthy people. For over 30 years I have preached and persuaded people to plant orchards and fruit gardens. Now more than ever it is proven that there is no method of occupying the soil so profitably as by planting trees, berry bushes or grapevines.

Wishing you a prosperous season, I remain,

Yours very truly, Charles A. Green.

C. A. GREEN AT WORK IN HIS OFFICE.

GETTING MARRIED.

Most stories end where people get married. This story is different. Adolphus and Julia have returned from their wedding trip and are at their little rural home near Cleveland, Ohio.

"This is a beautiful place," said Julia. "I only see one thing lacking and that is a fruit garden."

"That is true, my dear wife," said Adolphus. "I intended to set out rows of raspberries, blackberries, currants, gooseberries, grapes and a dozen or so each of plum trees, pear, peach and apple trees in a little garden back of the house. But I had so many things to 'tend to I was compelled to put off this planting."

"That is just the way my father used to do," said Julia. "My mother was ever wanting a fruit garden. My father is a good man and intended to plant vines and trees but he was always putting it off, thus year after year our homestead was without the helpful and delicious berries and other fruit."

"Nursery agents come along every fall," said Adolphus. "The first agent will get our order."

"I can tell you of a better way than that," replied Julia. "Send to Green's Nursery Co., Rochester, N. Y., for their illustrated and priced catalogue. In this way we can buy our berry plants, grape vines and fruit trees for less than half what the agent will charge. This is the way my father finally bought his fruit trees, and he found every one TRUE TO NAME, and they came so nicely packed that every one of them grew."

GOLDEN GLOW.

C. A. Green is a great admirer of this beautiful plant which springs up each year like a paeony. The tops die down, as winter approaches, but the roots will continue to send up new shoots and bear blossoms profusely for fifty years. Yellow flowers are rare. This is the best yellow flower we know of next to chrysanthemums. We want every patron to have a few plants of

Golden Glow, therefore Green's special low price of 35c. per 10.

Chestnuts.—American Sweet Chestnut is highly prized for excellent quality. C. A. Green planted a grove of this chestnut which have borne nuts for ten years. They are an object of great beauty.

Price of chestnut trees 4 to 5 ft. 50c. each, \$5.00 per 12. Price of trees 3 to 4 ft. 30c. each, \$3.00 per 12. See nuts on page 42.

THE NEW BRIGHT RED RASPBERRY SYRACUSE

C. A. Green says that this is the greatest and most valuable raspberry the world has ever seen. It is the largest of all bright red raspberries. Its flavor is of the highest grade. It is remarkably attractive and continues in bearing for over a month, but best of all it is perfectly hardy in Rochester during the most severe winters we have known. We have never given it any winter protection and it has never been injured by the most extreme cold weather.

This new SYRACUSE Raspberry is not new to us, as it has been growing extensively at Green's fruit farm for the past eight years. It has taken us eight years to secure a moderate stock of plants owing to the fact that this bright red raspberry does not make new plants freely as does the Cuthbert, therefore plants of the Syracuse will never be sold at a low price. The fact that this raspberry propagates from suckers, but makes few plants, is in its favor for those who plant it in garden or field for fruit. The fact that some red raspberry plants multiply rapidly by suckers is a curse rather than a blessing, for the plants soon get so thick along the rows that they will not produce good fruit. Owing to the fact that the Syracuse does not multiply rapidly, a row of plants or a plantation will continue in bearing for twenty years without renewing, if the ground is fertilized. The Syracuse is a vigorous grower and we are satisfied it will more than please our patrons. You may prepare yourself to be surprised when you see its large, beautiful fruit, and the abundance of it on such plants as you set out on your place. Remember that the price of these plants will never be low. C. A. GREEN.

GREEN'S NURSERY COMPANY:

We are in receipt of the sample of your

new red raspberry named Syracuse, and regard it as most promising, it being large and handsome and of good quality.

ELLWANGER & BARRY.

The price at present of Syracuse Raspberry is \$1.00 each by mail or express. See prices of plants and trees sent by mail post-paid on last pages.

Windsor Cherry is very late and is more valuable than others on that account. Windsor ripens on our grounds 16 days later than Gov. Wood. The early cherries are good for home use but the Windsor is more valuable for marketing. The Earlier Sweets sold at 4 to 5c per pound. The Windsor at 7 to 8c. The earlier varieties ripen the bulk of their crop with strawberries and this is a poor season for the shipper. We recommend the Windsor on account of its large, sweet, firm flesh, but especially on account of its late ripening.

Price 35c each for largest trees. Medium sized trees 25c. each. Smaller, 20c. each. See page 28 for further description and other cherries.

GREEN'S CHERRY COLLECTION.

The Montmorency hardy red cherry, and Early Richmond hardy cherry are among the most valuable of the hardy cherries which succeed every where in this country. C. A. Green offers

2 English Morrello, (late), 2 Green's Black Tartarian, 1 Windsor, (Black) 1 Yellow Spanish, 3 Montmorency and 3 Early Richmond cherry trees, all 5 to 6 feet high, first-class in every way, all carefully dug and packed, 12 trees, for **\$3.00**

Diploma Gold Medal Currant—See page 37 for illustration. This is the greatest currant on earth and the most productive. Notice that the price has been greatly reduced in this catalogue.

WHEN TO PLANT

In the fall plant from October first to December first. Send your order in to the nursery on or before October first if possible.

Plant trees and vines in spring from April first to June first. Send your order for trees etc., to the nursery for spring planting before March first if possible.

Remember there is no San Jose scale at Green's nurseries which are located 12 miles outside of Rochester.

SUGAR OR ROCK MAPLE.

Every one knows the beauty of the Sugar Maple. Every one knows about maple sugar and the fun of tapping maple trees.

Green's price for Rock or Sugar Maple, 8 to 10 feet high, boxed free, 50c. each, \$5.00 per 12.

CALIFORNIA PRIVET.

This next to Cedar and Spruce makes the best hedge for dividing city grounds, or for planting in front of your house, or at one side. Everybody is planting it.

See page 56 for special low prices.

GREEN'S SHADE TREE BARGAIN OFFERS.

We offer 3 Carolina Poplars, 3 American Elm and 3 Sugar Maple trees of the size mentioned above, also 1 Live-For-ever rose bush and 5 Golden Glow plants for \$2.95, packed free.

BARTLETT PEAR THE MONEY MAKER.

While we have the largest supply of Bartlett pears in this country, the demand for Bartlett pears is so great you should place your order early in order to secure them. For prices and description of Bartlett Pears see page 35.

For Kiefer pear bargains see page 34.

For Dwarf pears see page 36.

McINTOSH RED APPLE

(SEE COLORED PLATE.)

There is no better apple, no handsomer apple, no hardier apple in the world than McIntosh Red. It originated in Canada hence its hardiness. Size medium to large. Color dark bright red; flesh white, tender, juicy and refreshing. It is a good annual bearer of marvelously handsome fruit. It resembles Fameuse or Snow apple but is larger, darker brighter red, it is more hardy and fully as good in quality as the Fameuse. Its season is from October to January. We have kept it in good condition until spring. I consider it an early winter apple of great beauty and superior quality.

Several years ago I was so favorably impressed with the value of McIntosh Red apple I determined to make it a specialty and to propagate it as rapidly as possible. Up to this date I have not been able to secure a sufficient supply of trees owing to the great demand from every part of the country for McIntosh Red. But now I have at last secured through extensive budding and grafting a reasonable large supply of this wonderful variety. We are now ready to supply our patrons in every part of the country but we caution you not to delay your ordering for it is possible that we may yet be unable to supply the demand for trees of the McIntosh Red.

Price of McIntosh Red Apple Trees: Largest size 35c. each; medium size, 5 feet, 30c. each; Small size, 3 to 4 feet high, 20c. each.

FREEDOM FROM SAN JOSE SCALE and other Insect Pests a Notable Feature of Green's Nurseries.

We have no San Jose scale for the reason that Green's nursery farms are 12 miles away from any other nursery. There are no infested orchards in the district where our nurseries are located, and as there are no other nurseries nearby, everything is absolutely within our control. This is an important feature which our patrons have appreciated in the past and will more fully appreciate in the future. Where different nurseries are crowded together in one locality, if one nursery becomes infested with the scale others are likely to become infested, and thus the pest spreads from one to another block of trees. The only safety is in isolation as is the case with Green's Nursery Company. No Rochester nursery has San Jose Scale.

Early Orders—Owing to the scarcity of some kinds of trees, plants and vines, we advise that you send in your order at the earliest possible moment. Even if you are not ready to plant apple, pear and plum trees, send your order now, if possible, to make sure of getting the varieties you desire. See prize for early orders, page 25.

Green's Garden Collection No. 10 APPLE AND PLUM TREES

Twelve Trees for \$2.50

6 APPLE TREES

- | | | |
|----------------|----------------------|-----------|
| 1 Winter Rambo | 1 Yellow Transparent | 1 Wagener |
| 1 McIntosh Red | 1 York Imperial | 1 Wealthy |

6 PLUM TREES

| 2 Burbank, | 1 Thanksgiving, |
| 2 Lombard, | 1 Reine Claude. |

All trees of medium size, 4 to 5 feet high,
2 years.

6 PLUM TREES, SPECIAL BARGAIN PRICE, 68c.

Rose Collection No. 1

6 ROSE BUSHES FOR 98c.

Varieties are as follows: selected for hardiness and freedom of bloom: 2 Live-Forever Pink rose, 1 Madam Plantier, 1 Dorothy Perkins, 1 Magna Charta, 1 Crimson Rambler. All large, 2-year-old bushes which will bloom the coming summer. Regular price \$1.40.

Special Bargain Price, 98 cents

Plum Collection No. 2 and Rose Collection No. 1, both for \$1.50

ABOVE OFFERS ARE FOR SHIPMENT BY EXPRESS OR FREIGHT

BEAUTIFY THE HOME GROUNDS, SEE HOW IT WORKS.

Have you seen a dwelling, the grounds of which are barren of trees and vines? Have you seen a farm upon which there is no orchard, or fruit bearing trees? Have you seen these homes and farms after they have been beautified and made fruitful and profitable by the judicious planting of ornamental trees and shrubs? Bring these two pictures to your mind, one representing a house about which no trees or shrubs have been planted, the other showing the same place after planting. The first is a picture of desolation. The planting of one tree would relieve the barren appearance. The planting of fruit trees in the rear, and a few shrubs and trees in the front yard, or at one side, would create a transformation. Plant plum or peach trees to beautify a barren home and supply fruit for the table. Duty to your family urges you to plant.

A GOOD REPUTATION

This is what Charles A. Green has been working for the past twenty-eight years. When he started this business he found difficulty in selling his trees but as soon as people found that his trees were TRUE TO NAME he could hardly grow enough to supply the demand. We are compelled each year to increase our capacity, our force of laborers and packers to keep pace with our increasing business. "We have heard from our friends that you are reliable and a firm dealing fair and we want your trees" write many people. "We want your trees, plants and vines because they prove TRUE TO NAME when fruiting."

CHAS. A. GREEN recommends the following list of apples for planting in different States named below. Other varieties succeed there, but those named are the leaders:

For New England, New York, Pennsylvania, New Jersey, Indiana and Michigan.

American Blush	Jonathan,
Banana,	King,
Bismarck,	Lord Nelson,
Baldwin,	Northern Spy,
Ben Davis,	Red Astrachan,
Dutchess,	R. I. Greening,
Fanny, Fameuse,	Sutton Beauty,
Grimes Golden,	Wagener,
Gravenstein,	Wealthy.

For Illinois, Wisconsin, Missouri, Kansas, Minnesota, Iowa and Nebraska, all hardy:

American Blush,	N. W. Greening,
Ben Davis,	Rome Beauty,
Dutchess, Fameuse,	Shiawasee Beauty,
Hubbardston,	Stark,
Jonathan,	Willow Twig,
Maiden's Blush,	Yellow Transparent,
McIntosh,	York Imperial.

For Delaware, Maryland, Virginia, West Virginia, Kentucky and Tennessee.

Ben Davis,	Northern Spy,
Dutchess,	Stark, Wealthy,
Gravenstein,	Yellow Transparent,
Jonathan,	York Imperial.

For North and South Dakota, Wyoming and Montana, all hardy:

Dutchess,	Pewaukee,
Fameuse,	Wealthy,
N. W. Greening,	Yellow Transparent.

WHAT A BANKER SAYS ABOUT US

CAPITAL AND SURPLUS \$1,000,000

The Traders National Bank
Rochester, N. Y.

November 19, 1907.

To whom it may concern:

I take great pleasure in saying that I consider Green's Nursery Company entirely reliable, a house of many years' standing, and with undoubted business integrity and honesty.

I believe any merchandise purchased from them will be found strictly according to contract, and true to name.

We have known the officers for many years past, and our business relations have been entirely satisfactory. The company has ample capital for the business done, and we take pleasure in most heartily recommending them to anyone desiring to purchase trees, shrubbery or other nursery stock.

Very truly yours,
HENRY C. BREWSTER, President.

A MISTAKEN IDEA. Some prospective buyers of trees have an idea that nothing but the largest size trees are fit to plant, that all other sizes are poor trees. This is a mistake, as some of the best orchards are grown from the smaller size trees. Small trees are not third-class, but first-class of their size, and while we do not recommend the small planter, or one who plants a few trees, to select the small size for his planting, we do recommend the medium and small sizes to the orchardist. We have an especially nice lot of peaches and quinces in the smaller sizes, and a fair number of apples, pears, cherries and plums at prices quoted.

IF TRANSPLANTED OR CHEAP TREES are wanted you should write us. We issue no bargain list, but can meet the wants of nearly every one.

Burbank Japan Plum Tree

stop cultivation in one direction.

apart one way, and from 10 to 12 feet the other way. The trees are pruned the same way that apple trees are, when planted.

Plum Culture—It is an attractive sight to see a plum orchard in full bearing. Plums are not difficult to cultivate, and they are among the hardiest of our orchard fruits. Taking all into consideration, the best soil for plums is a loose, deep, gravelly loam, with an open subsoil, such as is suited for apples or potatoes, although almost any soil may be used provided it is well drained.

The trees can be planted much closer together than apple or pear, and yet in field cultivation it is not best to crowd any kind of fruit trees; but in gardens plums will fruit well when planted ten or twelve feet apart. Plum trees bear at an early age. The yield of plums from an acre is surprising. Perhaps no fruit needs more frequent manuring than the plum, owing to the great crops of fruit it bears. It will also succeed on rich, sandy soil. Plum trees are usually planted when two years old from the bud, although some of the strong growing kinds, Burbank, Abundance and other Japan kinds, especially, may be planted a year old with good results. Plum trees are planted about as far apart as peaches; that is, from 15 to 18 feet apart each way. Many growers prefer to plant them closer one way than the other, and eventually to

If this system is used they may be placed 18 or 20 feet

12 PEACH TREES, SPECIAL BARGAIN PRICE \$1.75

BURBANK, ONE OF THE BEST AND MOST PRODUCTIVE PLUMS.

Burbank Japan Plum Tree in Fruiting—A patron sending the above "Photo" states that this is one of the 1400 Burbank plum trees he has from which he sold 2200 bushels of fruit, six years after planting.

Niagara Plums.

Burbank is one of the best of Japan Plums. Unsurpassed for beauty and productiveness, as well as great hardiness of tree, with a foliage so perfect as to contribute in an essential degree to its health. Fruit large, oval, often with a slight neck; skin reddish purple; flesh yellow, rather coarse, but juicy and good. Its beauty as a market variety is unsurpassed.

Niagara Plum—This plum has become exceedingly popular through Western New York, where it originated. It is a very early plum, and valuable for this reason. It is red, large size, making an attractive appearance in market, and possesses good shipping qualities. It bears enormous crops of fruit with great regularity. No one will be disappointed in planting the Niagara plum, either for home use or for market. The tree is an upright grower, vigorous and healthy. I recently visited a plum grower in Niagara county, who was shipping one thousand baskets daily, of the Niagara plum. He informed me that it was bringing the biggest price in the market and was a veritable gold mine to him.

Price of Burbank and Niagara Plums. First-class trees, 5 feet high, 15c. each, \$1.50 per 12, \$10.00 per 100. Extra size, 6 feet high, 20c. each, \$2.00 per 12, \$13.50 per 100. Small size trees, 3 to 4 feet high, 10c. each, \$1.00 per 12, \$7.00 per 100.

WE CALL SPECIAL ATTENTION IN THESE PAGES

To the following valuable new fruits and ornamental trees, plants, etc., of great value, and to low combination offers.

On some of these items we make special low prices.

For further description of many of these items see further pages of our catalogue and index and order sheet on last pages.

Thanksgiving Plum—This is a new plum of great value introduced by our C. A. Green. It has been fruited near Green's fruit farm for thirty years. It is of the highest quality, bears soon after planting, is of large size and will keep longer than any other plum. Take C. A. Green's word of honor when he tells you that this is one of the best of the plum family.

Price of Thanksgiving Plum Trees: First-class 5 to 6 ft. 20c. each, largest size 25c. each. See page 14.

Green's Nursery Co. is the largest nursery of its kind in the world. It was established by C. A. Green thirty years ago.

GREEN'S PLUM COLLECTION

C. A. Green offers three each of the above plum trees, that is

3 Thanksgiving Plums,	3 Burbank Plums,
3 Abundance,	3 York State

plum trees, all superior trees, 5 feet high or higher, 2 to 3 years old, just the right size for successful transplanting for \$1.35, packed and put on board cars here.

Ostrich Plume or Pampas Grass—Our C. A. Green says that this is the handsomest ornamental plant on his place. It grows 5 to 6 ft. high and can be planted as a hedge or a shield. It blossoms late in the fall, each blossom resembling an ostrich plume. These blossoms can be used for decorating vases during the winter. Price of plants 10c. each.

York State Plum—This is one of the European plums which has become popular and widely known through Green's Nursery Co. during the past few years. It is of large size, superior in quality. It is a purple plum. It has no superior among all the other plums named in this or other catalogs. In the town where it first became known, buyers from Buffalo came each year to pick up every basket of this variety they could secure owing to its attractive appearance. It is in fact an enlarged German Prune. It is twice the size of German prune. Tree is far more vigorous in growth.

Price first-class 5 to 6 ft. 20 cents each. See page 11. Largest size 25 cents each

Abundance Japan Plum—Fruit large, showy and beautiful. Amber, turning to a rich, bright cherry color with a decided white bloom, and highly perfumed. Flesh light yellow, exceedingly juicy and tender and of a delicious sweetness, impossible to describe. Stones small and parts readily from the flesh. For canning it is also of the greatest excellence. Its season is very early, ripening in advance of other plums, (in August) adding to its special value.

"The Abundance plum at Green's fruit farm is a sight to behold. The branches are wreaths of fruit, and they, as well as the tree itself, are held up by props and ropes. That the Abundance proves to be all that is claimed for it seems now a settled fact. It is to us a blessing and a revelation—a blessing that we may enjoy plums of our own raising, and a revelation in that we have never been able to raise plums because of the curculio. Here we have an Abundance loaded with beautiful fruit, while not a precaution has been taken to destroy the curculio. Blessed be the Abundance plum. It is well named."

Moore's Arctic—Valuable for its productiveness and extreme hardiness. Fruit grown in clusters. Color dark blue or nearly black when fully ripe. Dr. Hoskins says this is the hardest plum he has tested, and others make the same report. The heavy demand for the trees of Moore's Arctic indicates its popularity.

Climax Japan Plum—Very large, heart shaped, a superbly rich plum, extremely early, ripens in the coast counties early in July. Color of flesh yellow, sweet and delicious with a pineapple fragrance.

October Purple—Productive; of good quality; a large, round, late purple Japan plum, especially recommended for late market.

Pond's Seedling—A magnificent English plum; form of Yellow Egg; light red changing to violet; flesh rather coarse. Tree a vigorous grower and most abundant bearer.

POND'S SEEDLING PLUMS

Price for Plum trees of all varieties on this page : First-class trees, orchard planting size, 4 to 5 feet high, 2 years, 15c. each, \$1.50 per 12, \$10.00 per 100. Extra size, 2 years, 20c. each, \$2.00 per 12, \$13.50 per 100. Small size trees, 3 to 4 feet high, 10c. each, \$1.00 per 12, \$7.00 per 100.

RED JUNE, a Valuable Early Market Plum

Red June Japan Plum—A vigorous, hardy, upright, spreading tree, as productive as Abundance; fruit medium to large, deep vermilion-red, with handsome bloom, very showy; flesh light lemon-yellow, slightly sub-acid, of good and pleasant quality; half cling; pit small. Of immense value for its very early ripening. It is best in quality of any of the early Japanese varieties and is exceptionally free from rot. Tree strong and spreading, immensely productive and comes into bearing in two or three years.

Wickson Japan Plum is another of Burbank's creations, and the largest of all plums. Tree a good grower of vase-like form, and an early and productive bearer. In several sections of the United States grafts set in 1895 fruited in 1896, showing superb specimens of fruit almost as large as turkey's eggs. From time fruit is half-grown till nearly ripe it is of a pearly white color; quickly soft pink shadings creep over it till in a few days it is changed to a deep crimson, covered with a light bloom. For marketing purposes it may be picked when white, and will color up almost as well as though left on the tree. Pit small; flesh tender, sweet

Plum Tree Collection No. 1 14 TREES FOR \$1.98

2 Shipper's Pride, 2 Burbank, 1 Beauty of Naples, 2 Lombard, 1 Red June, 2 Gueii, 1 Thanksgiving, 1 Live-Forever Rose Bush.

All Trees. Largest size 6 to 7 feet high. Also 1 McIntosh Red Hardy Winter Apple, 1 Elberta Peach, these two smaller trees.

12 PLUM TREES, SPECIAL BARGAIN PRICE, \$1.98

Satsuma Japan Plum—The fruit is rather large, sometimes two inches in diameter or more; form nearly round; cavity shallow; stem short and stout; suture distinct; surface a little rough with slight bloom; dots dark brown, distinct, numerous; color dark purplish-black; skin almost tough; flesh firm, juicy, dark purple; medium; stone small, plump, adhering to flesh; flavor rather tart, peculiar; quality best.

Price for all varieties of Japan Plums named above: First-class trees, orchard planting size, 4 to 5 feet high, 2 years, 15c. each, \$1.50 per 12, \$10.00 per 100. Extra size, 2 years, 20c. each, \$2.00 per 12, \$13.50 per 100. Small size trees, 3 to 4 feet high, 10c. each, \$1.00 per 12, \$7.00 per 100.

YORK STATE PRUNE. LARGE, BEAUTIFUL AND OF SUPERIOR QUALITY.

York State is one of the largest, best in quality and most productive of all prunes or plums. Size large; color dark blue, covered with purple blush; flesh yellow and delicious; freestone, ripening the last week in August, at Rochester, N. Y. This prune originated at Dansville, N. Y., where it has been grown largely by the Germans, who are great fruit growers. It is a seedling of the German Prune and has been sold by these Germans for German Prune to Buffalo fruit buyers in large quantities at profitable prices. It resembles Fellemburg more than it does German Prune. York State Prune is a vigorous grower, and is healthy and hardy here at Rochester.

Price of York State Prune: First-class trees, 5 feet high, 20c. each, \$2.00 per 12, \$13.00 per 100. Extra size, 6 feet high, 25c. each, \$2.50 per 12, \$16.00 per 100. Small size trees; 3 to 4 feet high, 15c. each, \$1.50 per 12, \$10.00 per 100.

SHIPPER'S PRIDE PLUM. HARDY, PRODUCTIVE AND GOOD. VERY LARGE.

Shipper's Pride—This large, round, purple plum is recommended for its certainty to produce a long crop of fruit, for its fine appearance and superior shipping qualities. The flesh is firm and of excellent quality; the tree is a strong, upright grower. In Northwestern New York, where it originated, it has never failed to produce a heavy crop since the original tree was large enough to bear. A plum that will produce large annual crops of large, handsome, good fruit, is indeed an acquisition.

Price of Shipper's Pride Plums: First-class trees, 5 feet high, 15c. each, \$1.50 per 12, \$10.00 per 100. Extra size, 6 feet high, 20c. each, \$2.00 per 12, \$13.50 per 100. Small size trees, 3 to 4 feet high, 10c. each, \$1.00 per 12, \$7.00 per 100.

Lombard Plum.

Extremely Hardy and Productive

The Lombard is a great favorite for the following reasons; The tree seems to adapt itself to any locality; it is extremely hardy, producing good crops where many varieties will not grow; it is a strong growing tree—trees on our grounds five years of age being as large again as some varieties planted the same year; it is exceedingly productive. My experience has been that it outyields most other varieties, and yet all varieties of plums are remarkably productive. It is not equal to some varieties in quality, and yet it is enjoyable eaten out of hand and desirable for canning and other domestic purposes. The fruit usually hangs so thick on the limbs that we are compelled to thin out one half. The more you thin it, the larger, brighter and better the remaining fruit will be. It is a handsome reddish plum, the flesh yellow, juicy and pleasant. Season—August. It is an excellent variety, and should be planted in all gardens and orchards. It can be relied upon for a crop often when some other varieties fail.

THE WONDERFUL LOMBARD PLUM TREE.

Price of Lombard Plum Trees: 2 years, largest size, 20c. each, \$2.00 per 12, \$13.50 per 100. Medium size, 2 years, 15c. each, \$1.50 per 12, \$10.00 per 100. Smaller size trees, 4 feet high, 12c. each, \$1.00 per 12, \$6.00 per 100.

BRADSHAW PLUM.

A very large and fine early plum, dark violet red, juicy and good. Trees erect and vigorous; very productive; valuable for market. The tree is very hardy and vigorous. As regards productiveness it is unequalled by any plum we have ever fruited. To produce the finest fruit, heavy thinning should be practiced. The quality is excellent, and it is destined to become one of the most popular of all plums for canning, while its attractive color, good quality and shipping properties will cause it to be sought for as a market variety. It ripens ten days to two weeks later than Abundance. This plum resembles Niagara in size, color and general good qualities. It is a grand variety, and no collection is complete without it. It is becoming better known each year, and it is a great favorite for home use, on account of its fine quality, and for market for the reason that it is possessed of great beauty, large size, and is enormously productive.

Price for Bradshaw Plum Trees: First-class trees, orchard planting size, 4 to 5 feet high, 2 years, 15c. each, \$1.50 per 12, \$10 per 100. Extra size, 2 years, 20c. each, \$2.00 per 12, \$13.50 per 100. Smaller size trees, 4 feet high, 10c. each, \$1.00 per 12, \$7.00 per 100.

GUEII PLUMS

Gueii—(Blue Magnum Bonum)—This is one of the newer varieties originating in New York state. Season of ripening rather late. The color is a dark purple. The flesh is firm, sub-acid and agreeable. Size large. It would be difficult to select a larger or more attractive plum for the garden or orchard than this.

Grand Duke Plum—This magnificent variety ripening the latter part of September. It is of the largest size. In color it is almost red or reddish purple. It is one of the best late plums for market, of great value for the home garden. Note that Grand Duke Plum is free from rot. The high grade and great beauty of this plum will make it popular. The tree itself is an object of great beauty. C. A. Green says do not fail to plant the Grand Duke plum.

Beauty of Naples Plum—A dessert plum of highest quality, medium size, greenish yellow, somewhat striped; very sweet, hardy, a good grower.

Green's Big Plum Collection No. 999

20 PLUM TREES, SPECIAL BARGAIN PRICE \$3.24

Shropshire Damson Plum—This is the best of the Damsons. These are smallish plums, produced in thick clusters or groups, almost hiding the branches from view. It is highly prized for canning and for preserving. The tree is not a rapid grower in the nurseries, is difficult to propagate, therefore trees are always in short supply, and cannot be sold as low as other plum trees.

German Prune—Medium; oval; purple or blue; juicy, rich, fine. Tree vigorous and very productive. One of the best. September. Sells for higher prices in market on account of high quality. A leading favorite. There is no easily grown fruit that gives greater or more certain profit than the German Prune. They were introduced in this country by Germans many years ago, and for a time these furnished the only market for them. But the prune as a fruit for drying has entirely surpassed the plum, and though it is always dried whole, the seed is not troublesome to the eater. The Pacific Coast States have furnished most of the prunes for commerce, but it is a fruit that succeeds equally well in the East, with the advantage that if more grown near our large cities, there will be considerable demand for the fruit for eating when ripened, but not dried.

REINE CLAUDE PLUMS

Reine Claude—(Bavay's Green Gage)—Roundish, oval, greenish, marked with red in the sun; a great favorite; of fine quality, tree a good grower and remarkably productive. Middle of September.

Price for all varieties of Plums named above: First-class trees, orchard planting size, 4 to 5 feet high, 2 years, 15c. each, \$1.50 per 12, \$10.00 per 100. Extra size trees, 2 years, 20c. each, \$2.00 per 12, \$13.50 per 100. Smaller size trees, 4 feet high, 10c. each, \$1.00 per 12, \$7.00 per 100.

THANKSGIVING PLUM, VERY HARDY and PRODUCTIVE RIPENS OCTOBER FIRST.

The Thanksgiving Hardy Plum—Very Productive, good quality and long keeper. It will keep for weeks and months after picking like an apple. Another year's experience with this valuable plum leads us to think that we have not claimed enough for it. We did not know that it was a very hardy variety until the winter of 1904 established that fact. This winter was the most severe ever experienced, and in consequence nearly all plum trees growing in the nursery rows in this country were injured or destroyed. The Thanksgiving Plum stood up nobly, not being hurt in the least, where all other varieties but natives were destroyed. Notice that Thanksgiving Plum is not only a variety of superior merit in many other respects, but that it is hardy makes this one of the most valuable varieties of the age. Thanksgiving Plum is also a very vigorous grower; it makes a nice straight tree in the nursery row.

Price of Thanksgiving Plum Trees: 2 years, largest size, 25c. each, \$2.50 per 12, \$16.00 per 100. Medium size, 2 years, 20c. each, \$2.00 per 12, \$13.00 per 100. Small size, 15c. each, \$1.50 per 12, \$9.00 per 100.

HOW TO GROW APPLES

*"He who plants a tree plants hope."
"He who plants an orchard plants a home."*

Hilly or rocky fields may often be profitably occupied by apple orchards, if the soil is fertile. Even if the soil cannot be plowed a profitable apple orchard may be established by mulching the soil about each tree or stirring it with the spade or pick until the trees become firmly established. Apple trees require fertile soil, such as is demanded for corn or wheat. Select an elevated site for any kind of orchard in preference to low ground, unless the low ground is located near a large body of water, which protects it from frost. In planting an apple or other orchard the best method is to mark out the land with an ordinary corn marker, the same as for planting corn: then locate the trees in every fifth row, if that is the distance you desire.

In this way your trees will form rows from every point of view, without any trouble in sighting or sticking stakes. After the trees are planted the ground is marked between the trees for planting corn or potatoes. Sometimes strawberries and other small fruits are planted between the trees. I know of many orchards in Western New York embracing only an acre that have yielded the largest portion of the profits of the entire farm; these acre orchards would often yield two hundred barrels of apples, sometimes four hundred barrels. I have known these apples to net two dollars per barrel; thus in favored seasons this orchard would bring in more money than all the other crops united, on a one hundred acre farm. He who would make his farm attractive to family or home, be it in city or country, must surround it with different kinds of fruits. Among these the apple is king. No fruit can be put to so many uses as the apple; it is in season almost the year 'round; the earliest coming at harvest, the latest keeping until harvest time. No fruit is more wholesome, no tree is more beautiful in blossom. An apple tree which may be purchased for fifteen cents you would not have taken out of your garden for fifteen dollars, after it had begun to bear its luscious and beautiful crops. The beautiful red apple, the sprightly yellow apple, the cunning striped apple, the delicious tart apple, and the rich sweet apple—all give you life and health. Apple trees should be planted 30 to 40 feet apart each way.

HOW TO LAY OUT AN APPLE ORCHARD

The larger trees represented in the above cut are those for a permanent orchard. The smaller represent either plum or peach trees used as fillers.

IF APPLE TREES are planted thirty feet or more apart each way, rows of plum trees can be planted between the apples, which grow more rapidly and so protect them from the winds and thus proving a great benefit

to the apple trees. After eight or ten years of productiveness, as the space is needed for the apples, the plum trees may be removed, and at the same time having yielded the planter a large return for his outlay and labor.

NO FARM CROP, on the average, will produce one fourth as much income per acre as will a good apple orchard. The average price paid for the fruit is steadily on the increase, and the enormous demand for home consumption, foreign shipping, canning and evaporating, assures you that it will continue to increase. We especially recommend planting long keeping, winter varieties such as Baldwin, Northern Spy, Wagener, Wismer's Dessert, Shiaswassee Beauty, Pewaukee, and Blenheim Orange.

NUMBER OF TREES to an acre if planted 30 feet apart, 50 trees; 35 feet apart, 35 trees; 40 feet apart, 27 trees.

YELLOW TRANSPARENT APPLES (From Photo)

Yellow Transparent Apple—If you want the best and most productive yellow summer apple, plant Yellow Transparent. It has succeeded well at Green's fruit farm, where it has borne fruit in nursery rows and on orchard trees the second year planted. It is something like Early Harvest in appearance. It is a stronger, more upright grower and as great a bearer. We had a photograph taken of an orchard tree, laden with fine specimens, borne two years after planting. It has been tested in almost every state in the Union, and has been found hardy, productive, vigorous and desirable in every way. Its quality is superior and this, with its great beauty and wonderful productiveness, makes it a favorite summer apple the world over.

Price of Yellow Transparent Apple: First-class trees, 2 to 3 years, 5 feet high, 20c. each. Extra size, 6 feet high, 25c. each, \$2.75 per 12. Small size trees, 4 feet high, 15c. each, \$1.50 per 12.

Duchess of Oldenburg—A large, beautiful Russian apple; roundish; streaked red and yellow; tender, juicy, pleasant; a kitchen apple of best quality, and esteemed by many for dessert. Tree a vigorous, fine grower, and an early and abundant bearer. September. Succeeds well in the Northwest, where most varieties fail. The hardiest valuable fall apple. We find Duchess the most valuable commercial variety, free from blight, a sure cropper, hardy as an oak, having survived in some instances when all others died (except Wealthy), and all in all a wonderful variety. Very hardy.

Price of Duchess of Oldenburg apples: First-class trees, 2 to 3 years, 5 feet high, 20c. each. Extra size, 6 feet high, 25c. each, \$2.75 per 12. Small size trees, 4 feet high, 15c. each, \$1.50 per 12.

Fanny (Late Summer Apple)—it is the handsomest fruit of the season, and there is no apple of its season that compares with it in fine quality. This apple is rare, being seldom found in any catalogue. We have taken great pains to have it true to name.

Fameuse (Snow Apple)—Hardy; medium size; deep crimson; flesh is snowy white, tender, melting and delicious. Tree vigorous with dark wood; one of the finest dessert fruits and valuable for market. November to January.

Price of Fanny & Fameuse: First-class trees, 2 to 3 years, 5 feet high, 20c. each. Extra size, 6 feet high, 25c. each, \$2.75 per 12. Small size trees, 4 feet high, 15c. each, \$1.50 per 12.

PLUM TREES AT BARGAIN PRICES SEE PAGE 4-6

Baldwin (Red Winter Apple)—What the Bartlett pear is to pears, the Baldwin is to apples for the Eastern and Middle States. While sufficiently hardy for these sections, it will not endure the severe climate of the Northwest. In Western New York the advice used to be in planting a thousand trees plant nine hundred and ninety-nine Baldwins, and plant the other tree a Baldwin also. While this would be too large a planting of one variety, it shows the high esteem in which this apple is held as a market fruit. No variety yields larger crops or bears shipment better, or is more attractive in color and size and shape, than the Baldwin. It is esteemed as an eating apple, and for cooking. Thousands of barrels of this fruit are exported to England annually. For a commercial orchard it can be relied upon. Large, bright red, crisp, juicy, and rich; tree vigorous, upright, and productive. In New England, New York, Ontario and Michigan, this is one of the *most popular and profitable sorts* for table or market.

Price of Baldwin : First-class trees, 2 to 3 years, 5 feet high, 20c. each. Extra size, 6 feet high, 25c. each. Small size trees, 4 feet high, 15c. each.

Ben Davis Apple is hardy and attractive, succeeds wherever apples are grown. Say what you will of it the market men like it, and somehow the customers do too, else they would not continue to buy it. There is no apple that has more favors on account of its hardness, productiveness, beauty and endurance in shipping. It is excellent for cooking. There are better apples, but where Ben Davis succeeds one can always be sure of success, owing to its regular and heavy bearing qualities.

Rhode Island Greening—This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than any other variety. It is a good keeper, but will keep better if picked early. This Greening is a beautiful yellow color when ripe, and is a most abundant yielder, producing immense crops. The fruit is invariably of large size, and is free from defects.

York Imperial Apple—This fine, hardy, large, red winter apple has rapidly leaped into favor of late, and on account of its beauty has been in demand for shipment to Europe. It succeeds over a wide range of country. It comes into bearing at four years from planting, bears regularly and heavily. The foliage and fruit are remarkably free from scab. The fruit is of medium size, skin yellow and almost wholly covered with two shades of red, the darker one disposed in distinct stripes. A good shipper, bringing highest prices.

Roxbury Russet—Medium to large. Surface rough, greenish covered with russet. Tree free grower, spreading; a great bearer. Keeps until June. Its great popularity is its productiveness and long keeping.

Winesap—Season, winter. Size, medium; color, bright red; flesh yellowish, firm, crisp, sub-acid. This is a hardy apple. Widely cultivated throughout the Western and Middle states.

Price for Apple trees of all varieties on this page : First-class, 2 to 3 years, 5 feet high, 20c. each. Extra size, 6 feet high, 25c. each, \$2.75 per 12. Small size trees, 4 feet high, 15c. each, \$1.50 per 12.

MAILING SIZE APPLE TREES. Many of our patrons live at distant points where railroad charges would deter them from ordering hence we offer mailing size apple trees.

Gano, Ben Davis, Grime's Golden, Jonathan, Rome Beauty, Winesap, American Blush, Green's Baldwin, Banana, Bismarck, Wismer's Dessert.

For prices on above see pages 62-63.

GREEN'S IMPROVED BALDWIN APPLE

At the rear of C. A. Green's Rochester, N. Y., dwelling stood a thirty-year-old apple tree which in every way appeared to be a Baldwin. The apples were placed in the cellar. The following March we were surprised to find them of a far brighter and better color than Baldwin. The red blush and streaks were brighter, and the yellow portions were more like gold than Baldwin. On eating these apples we found that the quality was far better than Baldwin. We cannot recall a more tender fleshed or better flavored apple. It has all the excellent qualities of the Baldwin. In quality and beauty it is far superior to Baldwin. It is a superior strain of the Baldwin. Prof. L. H. Bailey says that trees of certain varieties bear better fruit than others, and that by grafting from these peculiar trees we may greatly improve well known varieties. This is just what we have done.—C. A. GREEN.

Price of Green's Improved Baldwin: First-class trees, 2 to 3 years, 5 feet high, 25 cents each, \$2.50 per 12. Extra size, 6 feet high, 35c. each, \$3.50 per 12. Small size, 4 to 5 feet, 20 cents each, \$2.00 per 12.

**WISMER'S
DESSERT.**

Wismer's Dessert.—Hardy. Best of all in quality. The Dollar apple. The tree is iron-clad in hardiness. It is vigorous in growth and healthy in constitution. It bears very early, regularly, and excessively. The fruit is winter in season, and is a first-class shipper. It is of the most popular size, medium to large. It is very handsome in appearance, being smooth and most brilliantly colored. Its aroma and flavor are much superior to any other apple known. Its texture is like a pear, being extremely juicy, melting, rich, buttery and free from fibre. This cannot be said of any other apple.

Prof. John Craig says, "The quality of this apple pleases me very much. It is of a peculiarly distinct character in its melting juiciness. I know of no other apple having such a pleasant, melting charac-

ter of flesh, and being so free from fibre." Prof. L. H. Bailey says: "We agree here that it is a most remarkable apple. It has the least roughness in flesh of any apple I have ever eaten, and the flavor and texture are most excellent." Col. G. B. Bracket, U. S. Pomologist, says: "It is the most desirable for dessert of all I have eaten." **Price of Wismer's Apple Trees:** 2 to 3 years, 5 feet high, 25 cents each, \$2.50 per 12. Extra size, 6 feet high, 35 cents each, \$3.50 per 12. Small size, 4 to 5 feet, 20 cents each, \$2.00 per 12.

McINTOSH HARDY RED WINTER APPLE

McIntosh Red Apple—A very hardy variety, fruit of which is very attractive in appearance, of deep red color, good size, the flesh is very tender and delicious. It is especially desirable for fancy trade. It comes into bearing young, yielding large crops of good fruit almost annually. At Green's fruit farm we regard it as one of the most promising varieties of its class for general cultivation. Its season is from October to January.

Price of McIntosh Red Apple Trees: First-class, 2 to 3 years, 5 feet high, 30c. each, \$3.00 per 12, \$20.00 per 100. Extra size, 6 feet high, 35c. each, \$3.50 per 12, \$25.00 per 100. Small size, 4 feet high, 20c. each, \$2.00 per 12, \$15.00 per 100.

American Blush—Here is an apple that is not surpassed the world over for large size, great beauty of color, or for excellent quality. It is an apple that should be growing in every garden and orchard. Fruit large, roundish; color bright red on yellow skin; flesh yellow, with a fine, rich, aromatic flavor, sub-acid. The tree is a vigorous grower, and is exceedingly productive, bearing an abundant crop of fruit every year. This is a remarkable statement, since many varieties of apples bear only every other year. The foliage of the American Blush, resists scab, apple fungus and other diseases, being tough and leathery, which accounts in part for the great productiveness of American Blush. Season, November to March.

Price of American Blush: First-class trees, 2 to 3 years, 5 feet high, 20c. each, \$2.00 per 12, \$18.00 per 100. Extra size, 6 feet high, 25c. each, \$2.50 per 12, \$20.00 per 100. 4 to 5 feet, 15c., \$1.75 per 12.

Gloria Mundi—Largest late Fall apple in the world. There is a bearing tree of this apple at our fruit farm. It bears regularly nearly every season. It is a handsome apple, skin and flesh almost white. Quality enticing.

Price of Gloria Mundi Apples: First-class trees, 2 to 3 years, 5 feet high, 25c. Extra size trees, 6 feet high, 35c. each.

NORTHERN SPY APPLE.

This superior red winter apple originated near Rochester, N. Y. It has no superior for beauty and quality. When at its best it is of large size, and an abundant bearer. The fruit is held on a long, slender stem, which sways in the wind, therefore the Spy does not blow off from the tree. It is a good keeping apple. Season, December to February.

Price of Spy : First-class trees, 2 to 3 years, 5 ft. high, 20c. each. Extra size, 6 feet high, 25c. each. Small size trees, 4 feet high, 15c. each, \$1.50 per 12.

Blenheim Orange (Lord Nelson).—Our C. A. Green recommends this remarkably large and handsome apple with great confidence, since it has proved for him at Green's fruit farm one of

the most profitable varieties of early winter apples ever grown there. It ripens at a date when apples are in great demand, that is, before the other winter varieties are ripe enough to eat. The skin of this apple is of a gold-

BLENHEIM ORANGE.

en hue almost entirely covered with stripes and slices of bright red. Its quality is delicious.

This superb apple is known as the Blenheim Pippin in Canada and Blenheim Orange in England, where it originated. It is a regular bearer of large, handsome, reddish apples of good quality, desirable for dessert or for cooking purposes. The flesh is yellow, crisp, juicy, tender, and highly flavored. Its season is early winter, being at its best in December and January, but we have kept it much later. The tree is of handsome form and a good, rapid grower.

Price of Blenheim Orange Apple Trees: Medium size, 20c. each. Large size, 25c. each.

Pewaukee Apple, very hardy and productive—Fruit medium to large, skin bright yellow, striped or splashed with dark red; flesh white, tender, juicy. Esteemed especially for cold climates on account of its extreme hardiness. Tree is healthy and long-lived, comes into bearing early and is a reliable cropper, often yielding heavy crops of fruit annually. It is especially valuable for sections where hardiness and productiveness are the chief objects. January to May.

Price of Pewaukee Apples : First-class trees, 2 to 3 years, 5 feet high, 20c. each, \$2.00 per 12. Extra size trees, 6 feet high, 25c. each, \$2.75 per 12. Small size trees, 4 feet high, 15c. each, \$1.50 per 12.

Ontario—Hardy, fine, thrifty grower, very productive. Handsome, large size, yellow, nearly covered with bright red; juicy, and sub-acid, very valuable for the market and home use. October to February.

Mann Apple—Season, winter. Size, medium to large. An attractive yellow apple, mild sub-acid; a prolific and profitable variety. It is a long keeper in or out of cold storage. January to April.

Rambo Winter Apple—Medium size; streaked with yellow and red; tender, juicy, and mild flavored. Tree a vigorous grower and good bearer. A widely cultivated and esteemed old variety. October to January.

Tolman Sweet—Medium size; color, light yellow; flesh, white, firm rich, and very sweet. Excellent for winter baking. Nov. to April.

Maiden's Blush Apple—This is one of the handsomest and most highly prized of all the fall apples. Hardy and productive, succeeding not only in Eastern states but throughout many of the Western states. September

Jacob's Sweet—A large showy apple, green or yellowish, often with bright blush. It is one of the best sweet apples of its season. Fruit is very tender. Its keeping qualities vary. Season from October to December.

Northwestern Greening—A Wisconsin seedling of great value; has stood the most trying tests and found to be equal to Wealthy in point of hardiness; fruit large, smooth, greenish yellow; flesh fine grained, juicy, firm, good quality. January to April.

Stark—A hardy winter apple; tree a good grower, upright and spreading; good bearer, and much valued as a late keeper and fine market sort; fruit large greenish yellow, shaded and striped with dark red and sprinkled with brown dots; good to best. January to June.

Prices of all varieties of Apple trees offered on this page : First-class trees, 2 to 3 years old, 5 feet high, 20c. each. Extra size, 6 feet high, 25c. each. Small size trees, 4 feet high, 15c. each.

PLANT PLUM TREES OFFERED AT BARGAIN PRICES SEE PAGE 8

SHIASSEE BEAUTY APPLES

Shiassee Beauty apple, a variety which we have fruited at our fruit farm for a number of years; fruit of uniform size, hanging well to the tree, very hardy, vigorous, healthy and long-lived, yielding good crops annually; medium to large, skin pale yellow with attractive red splashes and striped with carmine; flesh white, fine, crisp, tender and juicy; quality very good, season October to January.

Wolf River—Originated in Wisconsin, and for many years has successfully stood that rigorous climate. Fruit is very large, some specimens weighing 27 ounces; round, flattened, conical, highly colored. An excellent cooking fruit.

Walbridge—Medium size, oblate, regular; skin pale yellow shaded with red; flesh crisp, tender, juicy. Esteemed especially in cold climates, for its hardiness and productiveness. Jan. to May.

Golden Sweet—Large, yellow; a very fine, sweet apple. Tree a free grower spreading irregular and productive. Aug. to Sept.

Pound Sweet—A late fall and early winter apple, highly prized for eating out of hand or for baking, known by some as Lyman's Pumpkin Sweet. Fruit of large size, greenish yellow, uniformly fair, smooth, and marketable. Our C. A. Green is particularly fond of this good old apple, which he sometimes keeps in his cellar well up towards spring.

Rome Beauty Apple—This is a large and handsome apple, almost entirely covered with bright red; of high quality. The flesh is tender, juicy and highly flavored. It is a popular apple over a wide range of country, particularly in the West. Dec. to Mar.

Yellow Bellflower—Season, winter. Hardy, large size, beautiful golden color, often with red blush; conical in shape. Flesh very tender and fine grained, crisp, juicy, sub-acid; of excellent quality. Nov. to April.

Hubbardston (Hubbardston Nonesuch)—Large; striped yellow and red; tender, juicy and fine; strong, good bearer. November to May. The Hubbardston has long been a popular early winter apple, often growing to the largest size, and always of good size. It is a handsome red apple, far superior in quality to many varieties. Hubbardston has become more popular recently than ever before, since it has been discovered that its leaves have great power to resist attacks of the apple scab fungus. Nov. to Jan.

Princess Louise—Prof. H. E. Van Deman says that this is a Canadian apple of great value. The size is medium, oblate conical, mixed and striped red over a yellowish, ground color; flesh yellowish, fine, juicy, tender; sub-acid flavor; good quality. My favorite.—C. A. GREEN.

Sweet Bough—Large, light yellow, tender, sweet and excellent for baking. Of compact, moderate growth, producing large crops annually and is a profitable market sort. Aug.

Red Astrachan Apple—This hardy early variety is well known, and a lengthy description is not necessary. Its merits are conceded in nearly every state in this country. Always demands a ready sale at paying prices, if grown for market, and is indispensable for home use. August.

Sutton Beauty Apple—C. A. Green has always been loud in praise of this beautiful winter apple, which he is growing largely and which he finds a remarkably profitable variety of superior quality. It is a rare variety seldom found in the catalogues, and on account of its great beauty, productiveness, and quality, should be found in every collection. Medium to large, roundish; waxen, yellow, striped with deep carmine; flesh white, sub-acid; tender, juicy, good. A long keeper. Jan. to Feb.

Price for Apple trees of all varieties on this page: First-class, 2 to 3 years, 5 feet high, 20c. each, \$2.00 per 12. Extra size, 6 feet high, 25c. each. Small size trees, 4 feet high, 15c. each.

WEALTHY—VERY HARDY, EARLY WINTER APPLE.

Wealthy Apple—This is a beautiful hardy winter apple, originating in Minnesota. It is gaining in popularity each year on account of beauty and quality, as well as its hardness. It is productive and an acquisition almost everywhere. Fruit large, roundish; skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; quality very good. This is one of the few most desirable varieties for Minnesota, Wisconsin, Iowa, Nebraska, as well as the Eastern and Middle States. In season it differs somewhat according to locality; in New York and neighboring states its season is December to February and earlier in others.

Price of Wealthy: First-class trees, 2 to 3 years, 5 feet high, 20c. each. Extra size trees, 6 feet high, 25c. each. Small size trees, 4 feet high, 15c. each, \$1.50 per 12.

The original King Apple Tree about 100 years old

King (King of Tompkins Co.)—A red winter apple. When you see in the market apples of extraordinary size, beautiful red in color, specimens that attract the attention of everybody who passes by, you may know that these are the King apple, an appropriate name since it is of the largest size and possessed of the greatest beauty. The market is never fully supplied with this variety, since its size and beauty make it in great demand. Tree a vigorous grower, good bearer and hardy. It is also highly attractive, and is always in great demand in the market. Last year dealers were looking everywhere for Kings. Do not fail to plant King Apple.

Price of King Apple: First-class trees, 2 to 3 years, 5 feet high, 20c. each, \$2.00 per 12. Extra size trees- 6 feet high, 25c. each. Small size trees, 4 feet high, 15c. each, \$1.50 per 12.

No Sir: Says old patron. No tree agent can sell me trees so long as I can buy better trees true to name direct of C. A. Green and save half of my money.

WAGENER—C. A. GREEN'S FAVORITE WINTER APPLE

Wagener (Red Winter Apple)—Wagener is one of the most beautiful winter apples ever grown. It is supposed to be a seedling of the Northern Spy. It is much brighter red than the Spy. It is of the highest quality, the flesh being crisp, tender and aromatic. I have known of no apple possessing greater beauty or of finer quality than the Wagener, and yet it is little known. It succeeds well East and West. All successful fruit growers desire such an apple as the Wagener, not only for their own eating, but as an attractive fruit to market at home or abroad. No orchardist's list of varieties can be complete without this beautiful and superior flavored apple. An old schoolmate drove past my home last season with beautiful crimson apples in his wagon. It seemed to me that I had never seen more uniformly attractive and perfect specimens. "See here, where are you going with those apples?" I asked. "They are sold to a regular patron, who buys them every year. They are the Wagener, and this man says they beat the world for quality and beauty." "Bring me four barrels when you come in next time; I cannot allow such fine fruit to pass my place unmolested." Medium to large; deep red in the sun; flesh firm, sub-acid and excellent. Tree a vigorous, handsome upright grower, and very productive; an excellent variety.

Prices of Wagener Apples: First-class trees, 2 to 3 years, 5 feet high, 20c. each. Extra size trees, 6 feet high, 25c. each. Small size trees, 4 feet high, 15c. each.

Bismarck Apple—An attractive apple in color and shape, the skin being a bright yellow covered on one side with bright carmine.

MAILING SIZE APPLE TREES

Many of our patrons live at distant points where railroad charges would deter them from ordering, hence we offer mailing size apple trees. American Blush, Banana, Green's Baldwin, Bismarck, Wisner's Dessert, Gano, Ben Davis, Grime's Golden, Jonathan, Rome Beauty, Wine-sap.

For prices on above see page 62.

low covered on one side with bright carmine. The principal feature of the Bismarck which recommends it to many people is that it bears fruit at a very early age. On a transplanted two-year-old standard tree were counted 26 handsome apples. The fruit is of large size, specimens having been grown weighing nearly two pounds each. The flesh is yellow, tender, juicy and of good quality. It keeps all winter.

Price of Bismarck Apple Trees: 4 to 5 feet high, 2 years, 35c. each, \$3.50 per 12. 3 to 4 feet high, 25c. each, \$2.50 per 12.

GREEN'S NURSERY CO., ROCHESTER, N. Y.

RETURN THIS COUPON WITH YOUR ORDER

BANANA APPLES SOLD AT \$12 A BOX

Banana Apple—The news has been flashed over the wires, and widely announced through the press, that the entire crop of Banana Apples grown in the Hood River District, Oregon, this year sold at \$12 per box, which is the highest price ever received for apples. These boxes contained less than a bushel of fruit. Green's Nursery Co. first introduced Banana Apples twenty years ago, but its value is just being discovered in the western states. For this reason orders are coming in fast, and it is doubtful if there will be enough trees to supply the great demand. Therefore do not fail to order early. It is of better quality than Swaar says, C. A. Green and Prof. H. E. Van Deman. The tree is vigorous and hardy. It is a great bearer, and the fruit is uniformly fair and handsome, the color of pure gold, with red blush on one side. The fruit is large and keeps well all winter. It smells and tastes like a banana. Do not delay to plant the Banana Apple tree. A friend told me yesterday that he planted Banana apple trees three years ago and that these trees bore fruit last fall. This indicates that the Banana is an early fruiting variety. I am at this date, February 8th, eating Banana apples and have been for several weeks. I have my apples stored in bushel boxes in a cold storage building, and take them out only as I want to eat them. I carried several of the Banana apples to the Western New York horticultural meeting, giving several of the members an opportunity to test its quality. Many spoke of its pronounced banana flavor; after eating a mouthful of this apple you have the sensation of having eaten bananas for half an hour. Ordinarily Banana is a bright golden yellow apple. We have been growing Banana apple at Green's fruit farm for many years. The tree is a good grower. No orchardist should feel satisfied without having the Banana in his orchard.

Price of Banana Apple trees: Medium size, 30c. each. Large size 35c. each. Small size trees, 4 feet high, 20c. each.

BEST HARDY CRAB APPLES

TRANSCENDENT CRAB APPLES

Transcendent Crab Apple—This is probably one of the best of all crab apples, is popular over the entire country. It is perfectly hardy everywhere and an immense bearer, yielding large crops every year. It is also a rapid grower and often bears fruit three years after planting. The color of this crab apple is as bright as the brightest red rose. As I have been driving by these trees in farmers' yards, filled with fruit, from the distance they seemed to look like red roses. These trees were beautiful objects when thus laden with bright red apples. The fruit of this crab is held in great esteem by housewives for making jelly, pickles and preserves. They can be dried, cooked, canned, or preserved with the skin on, saving a great amount of trouble. It is especially valuable for cider. Sept.

Martha—A rapid grower and a great bearer of the most beautiful fruit, a bright glossy yellow shaded with light, bright red. We are satisfied from our own tests of this variety that it will please all who may plant it. Oct. and Nov.

General Grant—Large, round, yellow, covered with stripes of red, and when exposed to the sun, turning quite dark; flesh white, fine grained, mild sub-acid; a good grower, hardy and productive.

Hyslop—Fruit large, deep crimson; produced in clusters; roundish, with thick blue bloom; flesh yellow, sub-acid; good for cider and culinary purposes; popular on account of its large size, beauty and hardiness. October.

WINDSOR CHERRY, great Canadian kind, sweet cherry, almost black, very late. Price 35c., 25c. and 20c. each tree.

Price of all varieties of Crab Apple Trees on this page: First-class trees, 2 to 3 years, 5 feet high, 20c. each. Extra size, 6 feet high, 25c. each.

The varieties in heavy black type are our main varieties, our leaders. The varieties with * star attached are a little higher in price than the general list. See descriptions. The varieties in common type whether described or not are in small supply and the prices, 25c, 20c, and 15c each according to size.

Prices of varieties with * star attached are Largest size 30c. each, Medium size 25c. each, smaller size, 20c. each. Price of other varieties of Apple trees, as above, 25 cents each, for largest; 20 cents each for medium size, and 15 cents each for small size, which are 2 to 3 years old, 4 to 6 feet high.

APPLE TREES are in very short supply everywhere. Orders should be sent early and second choice named, or order marked no substitution on variety, if no other variety acceptable.

American Sweet Chestnut, 4 to 5 feet high, 50 cents each, \$5 per 12, 3 to 4 feet 30c. each, \$3.00 per 12. See nuts, page 42.

Montmorency
Hardy Cherry.

CHERRY TREES FOR MARKET AND GARDEN.

There are few trees more attractive than the Cherry, on account of its beautiful foliage, its attractive blossoms, and showy fruit. It is more often planted upon the lawn of the village and city, as well as the farm lawn, than other fruit trees. It furnishes a delightful shade and is a clean tree. The cherry tree does better without cultivation than almost any other fruit trees, but if possible the first few years it should be cultivated, or mulched on the surface of the soil with manure. I have heard of a cherry tree that was $6\frac{1}{2}$ feet in circumference, with a spread of branches measuring 60 feet. Since it bore its first crop it has borne annually without one omission 600 to 1000 pounds, of superior cherries, selling for 7 cents per pound. We seldom hear of a cherry orchard. This may be a good reason why it is profitable to plant cherries. Surely it requires more labor to pick cherries than apples, but the profit is comparatively large. It is usual for people to avoid crops which require much labor, whereas those are the very crops wherein usually the most money can be made. Complaint is often made of birds feeding upon the cherries, but surely they are so productive a few would not be missed, and where the orchard is large the birds make but little impression upon the enormous yield, picking out mainly wormy specimens. The cherry tree bears almost every year, and is an early fruiter.

MORELLO OR HARDY CHERRIES

EARLY RICHMOND

Early Richmond Cherry—An early red, magnificent cherry, very valuable for cooking early in the season. Ripens through June. Tree a free grower; hardy, healthy and very pro-

ductive. One of the best. "If I could plant but one cherry it would be Early Richmond."

It is a safe, reliable, worthy favorite. I have at our fruit farm two rows and a half of Early Richmond cherry trees, each row containing about forty trees.

Late Duke—Large; light red; late and excellent. End of July.

Ostheim—(Russian) Very hardy; skin dark red, flesh reddish, tender, juicy, valuable where extra hardy varieties are required. June

MONTMORENCY, reduced size

Montmorency Cherry—Large; bright, shining red; acid; late; valuable. Hardy and productive. This variety seems to be almost as popular as the Early Richmond.

We seldom have trees enough to supply the demand. Canning houses like this variety. You cannot make a mistake in planting it. "For home use and market the Montmorency is valuable." It is a safe, reliable, worthy favorite. Last of June.

May Duke—An old, well known variety, large; dark red; juicy and rich. Tree hardy and productive; ripens a long time in succession. Middle of June.

Prices and sizes for hardy cherry trees of all varieties on this page: First-class orchard planting trees, 5 feet high, 20c. each, \$2.00 per 12, \$16.00 per 100. Price for selected largest sized trees, 25c. each, \$2.50 per 12, \$20.00 per 100. Smaller size, 4 feet high, 15c. each, \$1.50 per 12, \$12.00 per 100.

MORELLO OR HARDY CHERRIES

Large English Morello Cherry—Without doubt one of the most valuable of this class. Easily grown, generally producing a heavy crop. Fruit dark red, quality good, with a rich, acid flavor; late. Tree very hardy, and

recommended for extremely cold latitudes. August.

Dyehouse—A hardy and valuable cherry. Unquestionably the earliest cherry, ten days earlier than Richmond, fine quality, tree hardier—its

early bearing remarkable as its great hardiness. Often bears at two years old, and has the appearance of being covered with a scarlet cloth, such is the abundance of the fruit. Has the smallest pit of any cherry known; a splendid keeper and free from knots. For tarts, pies, and especially for canning, it has no superiors among cherries. June.

Prices and sizes for hardy cherry trees: Dyehouse and English Morello, First-class orchard planting trees, 5 feet high, 20c. each, \$2.00 per 12, \$16.00 per 100. Price for selected largest sized trees, 25c. each, \$2.50 per 12, 20.00 per 100. Smaller size, 4 feet high, 15c. each, \$1.50 per 12, \$12.00 per 100.

SWEET VARIETIES OF CHERRIES

A LARGE SWEET CHERRY TREE.

Windsor Cherry—Tree upright, vigorous and rapid grower; leaves large. Fruit large, roundish oblong, very firm, juicy, mottled red; flesh pinkish, sometimes streaked. Quality good, heavy bearer. It hangs a long time and does not rot badly. No cherry of recent years has attracted more attention, owing to its large size, beautiful dark color, almost black; its firmness; its qualifications as a shipper, and its excellent eating qualities. The variety has been recommended by Willard and others of the most prominent fruit growers of the country who have given it a thorough trial, and have found it unexcelled by any variety for home use and for market. It originated in the cold, severe climate of Canada. While we cannot recommend it as being hardy enough for the Northwest, it is a great success in Western New York and the Middle States.

Yellow Spanish—Very large, often an inch in diameter; pale yellow, with a handsome light red cheek next to the sun; flesh firm, with a fine, rich flavor; a general favorite. June.

Governor Wood—One of the best cherries; very large; light yellow, marbled with red; juicy, rich and delicious; tree healthy and a great bearer; hangs well on the tree vigorous. Last of June.

Napoleon Cherry—Tree medium size, erect with roundish head, fruit borne generally in twos; very large oblong cordate; light lemon yellow with red cheek in the sun. Flesh very hard, brittle, colorless, reddish at the stone. Stem of medium length, stout in a moderately deep, even cavity. Good, excellent bearer. Ripe about June 20th. The Napoleon Bigarreau is probably the most desirable light colored cherry for market purposes.

Price of Sweet Cherry Trees: Napoleon, Windsor, Spanish Yellow and Governor Wood, first-class selected two-year-old trees, 6 to 7 feet high, 35c. each, \$3.50 per 12. First-class orchard planting size, 5 to 6 feet high, 25c. each, \$2.50 per 12. Smaller grade 4 to 5 feet, 20c. each, \$2.00 per 12.

SWEET VARIETIES OF CHERRIES

GREEN'S BLACK TARTARIAN CHERRY

Green's Tartarian Cherry — In front of our Rochester house are two black cherry trees which are something of a wonder to all who see them. These trees never fail to bear a heavy crop of fine fruit. The trees are perhaps forty years old. They have reached an age when most cherry trees begin to fail and to become unproductive, but these trees are as productive as in their earlier years. A notable peculiarity of the fruit upon these trees is that it remains on the trees in an eatable condition for nearly three weeks. I have never known cherries to remain so long upon the trees. The fruit from these trees sells in the market more readily than any other fruit we are acquainted with. It is accepted by our market-men as the Black Tartarian. It has much the same appearance as the Black Tartarian, and yet we have never known that good old variety to remain so long in perfect condition upon the trees, which is a desirable feature in prolonging the season for family use. We call it Green's Tartarian cherry, not to indicate that it is a new variety, but to indicate that it is what we represent it to be — a superior strain of the Black Tartarian. — First of July.

Price of Sweet Cherry Trees, Green's Tartarian: First-class selected two-year-old trees, 6 to 7 feet high, 35c. each, \$3.50 per 12. First-class orchard planting size, 5 to 6 feet high, 30c. each, \$3.00 per 12.

Prof. H. E. VanDeman says as regards Bing and Lambert cherries: "They will be entirely successful anywhere that sweet cherries succeed. Their fruit will be larger and more solid than most cherries of their class. I recommend my friends to plant these varieties." In some eastern town these cherries are so large as to be mistaken for plums. C. A. GREEN.

Lambert Cherry — (new), one of the largest of all the sweet cherries. So far productive. Color, dark red; flesh, solid; an excellent shipper. Its season being late makes it especially desirable.

Price of Lambert: Large size trees, 75c. each; Medium size, 50c. each.

Bing Cherry. — So large in size as to be mistaken for plums. This new and superior sweet cherry originated near Portland, Oregon, is one of very large size, almost black in color when ripe, of fine quality, very productive, a good shipper.

Price of Bing Cherry Trees, large size, 50c. each; Medium size, 40c. each.

Cherries Profitable. — Mr. Corser, of whom we bought our Rochester house, says he sold \$66 worth of cherries from 4 Green's Black Tartarian Cherry Trees. This was an unusual crop of course. It is claimed that as much as \$300 has been made from one acre of cherries.

PEACH CULTURE

Much has been learned about peach culture within the past four years. At times peach culture has been entirely given up in Western New York and in Connecticut and many other states where now the peach is the most profitable of all orchard crops. It is perhaps the most beautiful, most tempting and luscious of all northern fruits. There is no fruit marketed which brings a higher price than well grown peaches. At one time it was supposed that only sandy soil was adapted to peach culture; later, it has been claimed that clayey loam is superior to sandy soil. Peaches will succeed on either sandy or clayey loam, if properly cultivated. Peaches will not thrive in uncultivated soil. The soil should not be made too rich, as the peach is a very rapidly growing tree. It has been recently discovered that there are varieties of peach that are very hardy in bud which scarcely ever fail to bear profitable crops, where other varieties around them are entirely destroyed by the severity of the winter. The number of varieties of peach has been largely increased of late years, somewhat to the bewilderment of the planter. We have aimed to confine our list to the cream, naming only those varieties which we have deemed best, all things considered. A neighbor, from six and five years old peach trees, picked seventy-five baskets of No. 1 peaches, and five baskets of a lower grade; he sold the best at \$1.00 per basket and the poor ones for 65 cents per basket, netting \$78.25.

CHAMPION ONE OF THE MOST HARDY PEACHES

Crosby Frost-proof Peach—A fine, handsome, yellow peach, with remarkably small pit, that bears regular crops north of the peach belt. Quality delicious; season follows quickly after Early Crawford. Crosby is now so well known that it will be no experiment planting it. It has been planted in nearly all peach-growing states, and is spoken of in the highest terms. Many large orchards of this variety have been planted the past season. The strongest claim for its superiority made over other varieties is the frost-proof character of its fruit buds.

Price of Crosby Peach: First-class orchard planting trees, 3 to 4 feet high, well branched, 15c. each, \$1.25 per 12, \$9.00 per 100. Price for selected size trees, 18c. each, \$1.80 per 12, \$12.00 per 100. Small size trees, 2 to 3 feet high, 10c. each, \$1.00 per 12, \$6.00 per 100.

20 PLUM TREES, SPECIAL BARGAIN PRICE \$3.24

PACKING EARLY CRAWFORD PEACHES FOR MARKET.

Crawford's Early—A magnificent large yellow peach of good quality. Tree vigorous and prolific; its size, beauty, and productiveness make it one of the most popular varieties. Season beginning of September. This valuable peach has long been a favorite for large size, beauty, and quality of fruit. Most people when they buy peaches ask for Crawford's, knowing but little about any other variety. In past years this was the earliest peach, but now much earlier kinds are known, hence it is about mid-season in ripening. Everybody who plants peach trees plants Crawford's Early. A superior variety that should not be omitted.

Price of Early Crawford Peach: First-class orchard planting trees, 3 to 4 feet high, well branched, 15c. each, \$1.25 per 12, \$9.00 per 100. Price for selected size trees: 18c. each, \$1.75 per 12, \$12.00 per 100. Small size trees, 2 to 3 feet high, 10c. each, \$1.00 per 12, \$6.00 per 100.

Crawford's Late—A superb yellow peach, very large, productive, and good; ripens here about the close of the peach season. Season last of September. Not a very late peach—its season is just right. The largest of all the older kinds at Green's fruit farm. It does not overbear, thus does not need thinning. Its quality is superb.

Champion—Fruit, large, sweet, rich and juicy; skin creamy white, with red cheek, freestone and a good shipper. Ripens early.

Fitzgerald—Grows similar to Crawford and ripens between Early and Late Crawford; flesh rich, deep golden yellow, with high character; certainly a very fine peach. The tree commences bearing young, is productive, and in Canada and Michigan has proven one of the hardiest.

Gold Drop—Large, good quality, hardy; a profitable market sort; follows Crawford Late.

Hill's Chili—Fruit medium size, oblong; skin yellow, shaded with dark red; flesh yellow, very rich and sweet; freestone.

Chair's Choice—Fruit of very large size, yellow, with a red cheek; flesh yellow, firm and of good quality; tree a strong grower and a good bearer. Ripens just before Smock.

Price for all varieties of Peach trees named on this page: First-class orchard planting trees, 3 to 4 feet high, well branched, 15c. each, \$1.25 per 12, \$9.00 per 100. Price for selected largest sized trees, 18c. each, \$1.75 per 12, \$12.00 per 100. Small size trees, 2 to 3 feet high, 10c. each, \$1.00 per 12, \$6.00 per 100.

ELBERTA PEACH—LARGE AND PRODUCTIVE.

Elberta Peach—Unsurpassed as a valuable, large, beautiful peach of good quality. The best orchard variety, and valuable also for planting in the garden. A friend near Rochester has planted fifteen acres entirely to Elberta. Elberta is hardier in bud than many varieties,

therefore a more uniform cropper. At Green's fruit farm this year we are harvesting a large crop of Elbertas, and yet we had three consecutive frosts last spring that destroyed nearly all peach buds in this locality. Many people have feared that too many Elbertas would be planted, but I think these fears are groundless, since it is such a valuable variety. Owing to the great demand for Elberta trees, we are compelled to limit somewhat the number of Elberta trees desired with each order, and yet have a large supply of this variety. Elberta is large, yellow, with red

The best authority on peaches in the United States, planted 60,000 Elberta. Why? Because he well knew its value. This most excellent variety will be called for by the thousand.

Orders should be sent in early, while our stock is large.

cheek, juicy and high flavored, flesh yellow ; freestone. Season medium_early, following quick upon Early Crawford.

Price of Elberta Peach: First-class orchard planting trees, 3 to 4 feet high, well branched, 15c. each, \$1.25 per 12, \$9.00 per 100. Price for selected size trees, 18c. each, \$1.80 per 12, \$12.00 per 100. Small size trees, 2 to 3 feet high, 10c. each, \$1.00 per 12, \$6.00 per 100.

ORCHARD OF NIAGARA PEACHES.

Niagara Peach—A new variety, but fully tested by extensive orchard planting near Rochester, N. Y. It may be called the New Elberta, since in appearance it is just like Elberta. It seems to have all the desirable qualities of Elberta with none of its defects. One defect of Elberta is that the foliage is liable to be affected with the fungus that causes leaf curl, while the foliage of Niagara peach cannot be surpassed in healthfulness and vigor, and for its ability to resist fungus, being almost of the character of leather. Another reason is that while Elberta is of good fair quality, Niagara is superb in quality and far superior to Elberta. Niagara ripens one week earlier than Elberta, ripening here September 1st. It is remarkably free from yellows and leaf curl. Prof. Van Deman says: "I have heard the Niagara peach spoken of in the highest terms. Those who have fruited it prefer it to any other, and think it even better than Elberta or Early Crawford. I have seen and eaten Niagara. It is of large size, beautiful, and better in quality than Elberta."

Price of Niagara peach trees is as follows: First-class orchard planting trees, largest size, 20c. each, \$2.00 per 12, \$15.00 per 100. Medium sized trees, 18c. each, \$1.80 per 12, \$12.00 per 100. Small size trees, 2 to 3 feet, 12c. each, \$1.25 per 12, \$7.50 per 100.

Engle's Mammoth—Large, round, suture slight; yellow, with red cheek; flesh yellow, stone small, free; sweet, rich, juicy. Sept.

Greensboro, a good, very early, white-fleshed, red-cheeked peach, hardy, productive and a favorite at Green's fruit farm. Aug.

Price of Engle's Mammoth and Greensboro: First-class orchard planting trees, 3 to 4 feet high, well branched, 15c. each, \$1.25 per 12, \$9.00 per 100. Price for selected size trees: 18c. each, \$1.80 per 12, \$12.00 per 100. Small size trees, 2 to 3 feet, 10c each, \$1.00 per 12, \$6.00 per 100.

PLANT PLUM TREES AT BARGAIN PRICES. SEE PAGES 8 TO 14

STANDARD PEAR TREES

Price of Kieffer Pear (only) largest size, 6 to 7 feet, 18c. each, 50 for \$7.50, 100 for \$15.00.

KIEFFER HARDY WINTER PEAR

KIEFFER PEAR, Standard and Dwarf—The Kieffer has many admirers on account of its splendid growth of tree, productiveness, and selling well in market. For the home market this variety will not be a favorite with all, although some like the fruit, and everybody admires the tree, which is as good an ornamental tree as ever graced a lawn or door yard. One fruit grower said: "Owing to the question of quality he thought it would not sell, but the past season buyers ran after him and sought the Kieffer." Its looks sell it. He has 1,600 trees. Those ten years from the bud, were as large as Bartletts 25 years old. The fruit hangs on well and is not liable to be blown off, and is good to handle because it is hard when fit to pick. The Kieffer succeeds best as a standard.

Sheldon Pear—First quality; large, round, russet and red, melting, rich and delicious. Tree vigorous, erect and handsome, and bears well when grown. As a standard, should be more largely planted.

Lawrence—Late Winter Pear—Standard and Dwarf.—Size, medium to large, obovate; golden yellow; flesh melting, with a pleasant aromatic flavor. Tree a moderate grower and abundant bearer.

Price of Standard Trees for all varieties mentioned above except Kieffer. First-class 2 to 3 years, 5 feet high, 20 cents each, \$2.25 per 12, \$18.00 per 100. Extra size, 25 cents each, \$2.50 per 12, \$20.00 per 100. Small size trees, 4 feet high, 15 cents each, \$1.50 per 12, \$12.00 per 100.

See above bargain prices for the best Kieffer pear trees you ever saw.

Seckel Pear—Standard and Dwarf. The standard of excellence in the pear, small, but of the highest flavor and production, and small Seckels sell better than large, if smooth and fair.

Anjou (Beurre d'Anjou)—Standard and Dwarf—A large, handsome pear, buttery and melting, with sprightly, vinous flavor; keeps into mid-winter. Tree a vigorous grower and a good bearer.

Clairgeau—Standard. Very large pyriform; yellow and red; handsome and attractive; flesh yellowish, nearly melting; keeps sound a long time after being gathered. Tree a free grower and early abundant bearer; a magnificent and valuable market fruit.

Duchess Pear—(Duchesse d'Angouleme)—Standard and Dwarf. Trees of the Duchess are great yielders, and being vigorous growers are money makers. What the Bartlett pear is as a standard, the Duchess pear is as a dwarf. The Duchess tree has a vigorous and healthy growth, and bears uniformly heavy crops of large and attractive fruit. There is no pear in existence which outyields the Duchess. The fruit is prized as a dessert fruit or for cooking.

Wilder Early Pear pleases all because: First, it looks well; it is a good grower. Second, it produces a crop early; two-year grafts at the nursery and trees four years old produce a lot of fruit. Third, the quality of the fruit is the best. Fourth, one does not have to wait until frost to get it. It ripens August 1st or before.

HARVESTING BARTLETT PEARS.

Bartlett Pear.—*Successful as Standard or Dwarf.* Dwarf Bartlett pears in C. A. Green's garden only 5 feet high were filled with beautiful specimens. What the Concord is among grapes, the Baldwin among apples, the Crawford among peaches, is the Bartlett among pears. It is the *most popular pear*, both for home use and market, that the world has ever known. It is buttery and melting, with a rich, musky flavor. The tree is vigorous and rapid in growth. Its season is September. Many people remove half of the fruit in August, ripening this for market, thus relieving the tree of its strain and securing larger fruit from that which remains on the tree. As the Bartlett is liable to overbear, nearly half of the fruit should be removed early in the season when about the size of a hickory nut. If this is done and the trees are kept in cultivated soil and well fertilized, they will bear profitable crops of the finest specimens imaginable. All pears should always be picked before fully ripe to secure best quality.

Price of Standard Bartlett: First-class trees, 2 to 3 years, 5 feet high, 25c. each, \$2.50 per 12, \$20.00 per 100. Extra size, 30c. each, \$3.00 per 12, \$25.50 per 100. Small size trees, 4 to 5 feet high, 18c. each, \$2.00 per 12, \$15.00 per 100.

Clapp's Favorite Pear.—*Standard and Dwarf.* Season, August, earlier than Bartlett.

This is without doubt the most productive pear in cultivation. Every limb is a veritable rope of pears. A splendid pear resembling the Bartlett and ripening a few days earlier. A cross between Bartlett and Flemish Beauty; the tree is hardy and vigorous, either as standard or dwarf. Care should be taken to pick the fruit ten days before it ripens upon the tree. This pear is very large, remarkably beautiful and a prolific bearer. No collection is complete without it. Larger than Bartlett and has a handsome red side.

Price of Standard Clapp's Favorite Pear: First-class trees, 2 to 3 years, 5 feet high, 25c. each, \$2.50 per 12, \$22.50 per 100. Extra size, 30c. each, \$3.00 per 12, \$25.50 per 100. Small size trees, 4 to 5 feet high, 18c. each, \$2.00 per 12, \$15.00 per 100.

Flemish Beauty.—A large, beautiful, melting sweet pear. Tree very hardy, vigorous and fruitful; succeeds well in most parts of the country. Needs an open sunny location on well drained soil for best results. Season September and October.

Price of Standard Flemish Beauty: First-class trees, 2 to 3 years, 5 feet high, 20c each, \$2.25 per 12, \$18.00 per 100. Extra size, 25c. each, \$2.50 per 12, \$20.00 per 100. Small size trees, 4 feet high, 15c. each, \$2.00 per 12, \$12.00 per 100.

STANDARD PEAR TREES

Gans Seedling Pear, New—This valuable summer pear was sent us by the originator, who is an old friend and patron, six years ago. This has given us time to fruit the pear at Green's fruit farm and to test its merits. Our C. A. Green is greatly pleased with it. It is a valuable early variety of high quality. Ellwanger & Barry describe it as follows: "A fine early pear, ripening just after Tyson and a week or ten days before Bartlett."

Price of Gans Standard trees: Medium size, 2 years, 35c. each. Large size, 50c. each. Price of Dwarf trees of Gans pear, 30c. each.

Worden-Seckel Pear—This is a seedling of the Seckel, which it resembles and fully equals in flavor and quality, and far surpasses in size, color, form and beauty.

Price of Worden-Seckel Standard medium sized trees, 50c. each; small size trees, 25c. each. Dwarf trees, medium size, 25c. each, large size, 45c. each.

Bosc Pear—Finest quality, large as Bartlett, very productive.

Price of Bosc pear trees: Strong, 2-year planting size, 50c. each; small size trees, 25c. each.

PLANT DWARF PEAR TREES IN HEDGE ROWS.

Duchess Pear—(Duchesse d' Angouleme). A fruit grower writes me that Duchess dwarf pear trees give uniformly large crops of pears of marvelous size and good quality. He says that in his locality the Duchess is grown more largely than any other, several growers having from three to ten acre orchards, and they find it a profitable fruit. Trees of the Duchess are great yielders, and being vigorous growers are money makers. What the Bartlett pear is as a standard, the Duchess pear is as a Dwarf. The Duchess tree has a vigorous and healthy growth, and bears uniformly heavy crops of large and attractive fruit. There is no pear in existence which outyields the Duchess. The fruit is prized as a dessert fruit or for cooking. Like all

Dwarf pears, it should have the branches of the last season's growth cut back at least one-half every fall or in the spring before the growth begins.

Dwarf Pears should be planted so that the point where the bud is on the quince root be two inches below the surface of ground. Standard trees should be set so that in their new position they are a little deeper than they were before they were taken from the nursery row. The fruit should be picked when the stem will part readily from the branch, without breaking. Pears should be ripened in a dark room and should not be left to ripen fully on the tree. It will pay well to thin the fruit wherever it is too thick, and pull off any knotty or poor specimens. This should be done at different times during the summer.

Dwarf Pear Trees bear at an early age, often bearing the second year after planting. They occupy but little room, and yield superior specimens of fruit and an abundance of it. Dwarf pear trees should be kept cultivated, and yet I have seen dwarf pear trees bearing abundantly in sod ground that had not been cultivated for many years. But where the ground is not intended to be cultivated, ordinarily the standard pear tree will do better than the Dwarf tree.

Varieties of Dwarf Pears—We offer the following list of superior varieties of Dwarf pear trees. Bartlett, Gans, Clapp's Favorite, Duchess, Howell, Lawrence, Worden Seckle, Seckle, Howell Beauty, Flemish Beauty, Wilder Early.

Price of Dwarf Pear Trees: First class orchard planting trees, 18c. each, \$1.75 per 12, \$12.00 per 100. Extra large selected trees, 20c. each, \$2.00 per 12, \$15.00 per 100. Small size trees, 15c. each. \$1.50 per 12, \$10.00 per 100. Except Bartlett Dwarf Pear Trees prices of which are: First-class orchard planting trees, 22c. each, \$2.25 per 12, \$16.00 per 100. Extra large selected trees, 24c. each, \$2.50 per 12, \$19.00 per 100. Small size trees, 19c. each, \$2.00 per 12, \$14.00 per 100.

If a quantity of Duchesse alone are wanted ask for special pear prices.

THIS IS AN ERA OF DWARF TREES.

DWARF DUCHESS PEAR.

Dwarf trees have been recommended by the leading pomologists. Dwarf trees being trained low can be easily sprayed and the fruit can be readily gathered. Dwarf trees occupy but little ground.

The best of all dwarf trees is the pear. The fruit of dwarf pear trees is larger and more handsome than that of the standard pear, for the same reason that the fruit of grape vines that have been retarded by removing a ring of the bark, is larger than ordinary. The dwarfing of pear trees increases the size of the fruit.

APPLE TREES SCARCE.

There has never been such a scarcity of apple trees all over this great country as this year. Some other kinds of trees are also scarce. This is the reason why no dozen or hundred price for trees can be found in this catalogue. Ask for 50, 100 or 1,000 prices if planting largely.

HOWELL DWARF PEAR.

This is one of the most beautiful and productive of all pears. Howell does remarkably well on dwarf trees. The fruit sells quickly on account of its great beauty. No one will be disappointed with the Howell. See page 36 for price and description of dwarf pears. See pages 34 and 35 for standard pear trees.

KIEFFER AND KOONCE DWARF PEAR TREES.

We can supply dwarf trees of Kieffer and Koonce at the remarkably low prices of 8c. for first-class medium size, and 12c. for the largest sized trees. The Kieffer is a large pear. It grows quickly and bears abundantly. Koonce is similar to Kieffer. The fruit

of both these varieties is especially desirable for canning. Notice our special low price for these two varieties. See page 36 for other dwarf pear trees and prices.

Dwarf Pear Hedge.—Don't fail to plant a row of dwarf pear trees through your garden. Set the trees 2 to 3 ft. apart in the row. Cut the branches back 6 to 12 inches each winter and you will be astonished at the large amount of beautiful fruit which you will secure soon after planting from this row of dwarf pear trees which will take up but little room in your garden. See page 36 for dwarf pear trees and prices. See pages 34 and 35 for Standard pear trees.

HOW TO PLANT TREES, VINES AND PLANTS.

Green's book on fruit culture entitled "How I Made the Old Farm Pay" not only gives the life-long experience of C. A. Green as a fruit grower, but it gives also careful instructions how to plant, how to prune and also how to grow every kind of plant, tree and vine. The price of this book is 25c., but if you as a prospective buyer will send us 10c. for packing and mailing, I will send this valuable book which should be worth \$1 to every fruit grower.

GAND'S EARLY PEAR.

This is a new variety of great merit, one of the largest and best of the early varieties. Do not fail to plant a few of the Gand's pear. For description and price of this and other dwarf pear trees see page 36. See pages 34 and 35 for standard pear trees.

GREEN'S BARGAIN IN DWARF TREES.

11 Pear and 1 Plum tree for \$1.50.

2 Clapp's Favorite, 3 Duchess, 3 Howell, 2 Kieffer, 1 Koonce, and 1 Thanksgiving plum tree, all 2 year old, 1st class, medium size,

ALL FOR \$1.50

Plums for the Home Garden.—Don't fail to plant a few plum trees. There is no fruit more highly prized by the housewife than the plum. The plum bears soon after planting. The plum tree is remarkably productive. Plums make the finest sauces and preserves, and are beautiful ornaments when placed upon the table to be eaten out of hand. Plums are in every way desirable. The plum tree requires but little room in the garden. I will never forget the plum trees on the homestead where I was born. How patiently I waited for these beautiful fruits to ripen, and how eagerly I ate the first ripe plum that fell from the trees. The plum tree in blossom is a beautiful sight. See pages 8, 9, 10, 11, 12, 13, 14.

QUINCE CULTURE.

ORANGE QUINCE VERY PRODUCTIVE

Orange Quince—Every one is well acquainted with the Orange quince, a good old variety that never disappoints the planter—good for home use and for market, and more largely planted than any other variety. Its large, golden yellow fruit of fine quality is to be seen in more or less quantities in nearly every garden or orchard every season, as it rarely fails to produce a crop.

BOURGEAT QUINCE

and shape of an apple tree, while most quinces grow in the form of a bush. The Bourgeat quince bears at an early age, producing large crops of exceedingly large and handsome fruit, of a rich golden color. While it ripens soon after the Orange it keeps till past midwinter when desired, or it is ready to use at once on maturity. This is a remarkable characteristic, since ordinary quinces are of a perishable nature. The crop can be held in the hands of the grower or in the hands of the purchaser until the market suits his fancy. It has so far proved to be free from leaf blight, the leaves keeping green until killed by frost.

The quince could be judiciously grown for its beauty alone. Nothing could be more attractive than a bush of this quince in fruit or in blossom. The fruit remains on the tree a long time after coloring, before ripe enough to gather, hence being desirable for that reason, as an ornament. But it is for its excellence as a canning fruit, for marmalades and jellies, that the quince is especially esteemed. It possesses a flavor peculiar to itself and unknown in all other fruits. Choice fruit of the quince is ever in demand at paying prices.

Meech's Prolific Quince—This variety is holding its good name and pleasing all who are fruiting it. It is rightly named prolific, being prolific in growth, prolific in yield and prolific in all good fruit points that go to make up a good fruit.

CHAMPION
QUINCE

Champion Quince—This is a large fruited quince. Color, bright yellow; flesh tender and most excellent for making preserves, jellies, marmalades, etc. Champion quince has a delicate flavor peculiar to itself. The trees are vigorous growers and bear heavy crops of superior fruit. The peculiarity of this quince is that it yields fruit on very young trees soon after planting. The fruit keeps well and ships well. Notice that quince trees are scarce this year all over the country. The fact is, that genuine varieties correctly named can scarcely be found anywhere.

Price of all varieties of Quinces on this page: First-class bushes, 3 to 5 feet high, 50c. each, \$4.50 per 12. Small size bushes, 3 feet high, 35c. each, \$3.50 per 12.

BLACKBERRY CULTURE

Blackberries—If you were born on the farm you will remember gathering wild blackberries along the borders of the woodlands when you were a child, as I remember. There is no fruit more highly prized for the table, for making pies, jams and sauces than the blackberry. Healthy cordials are made from the juice of the blackberry. It is a beautiful fruit. Plant only hardy varieties, such as we offer in this catalogue. When our bushes have grown to about four feet high we pinch back the canes, and early in the season the side branches are clipped back not to exceed eight or ten inches. This will reduce the berries in number, but they will be so much larger as to bring more money in market. Every bud where the bush is cut back will produce a large cluster of berries. We had a good crop at the same time that the berries of other persons were dried up. Both cutting back and frequent cultivation between the rows are necessary. The bushes should not be allowed to grow more than four feet high, and be cut back early in the season. Blackberries should be planted in rows, six to seven feet apart, three to five feet in the row. Keep the ground light and rich.

Eldorado Blackberry.—The hardiest and sweetest blackberry. At Green's fruit farm this variety has never winter-killed or failed to produce a full crop of the finest fruit. The vines are very vigorous and hardy. Berries are very large, jet black, borne in large clusters, and ripen well together; are very sweet, melting, pleasing to the taste, have no hard core, and keep eight to ten days. C. A. GREEN.

"The Eldorado is the most promising of the newer hardy blackberries. It appears to be as hardy as Snyder, and is larger and of better quality."—*Ohio Experiment Station.*

"From last year's experience I can say that the Eldorado is an immense producer, the berry ripens evenly and is very sweet, medium in size, second early. The yield was much greater than that of any other variety on our grounds last year."—*Geo. C. Butz, Horticulturist State College, Pa.*

Price of Eldorado Blackberry, 65c. per 12, \$3.00 per 100, \$25.00 per 1000.

Snyder Blackberry.—This popular, hardy and profitable blackberry is known everywhere and planted largely. Where other varieties have entirely failed it proved itself entirely hardy. It is also grown in localities where

SNYDER.

hardiness is not the prime and first consideration because of its productiveness and general adaptability to all locations. It is the blackberry for every fruit grower desiring to make a start in blackberries, but has not the means to buy the high-priced varieties. Keep the soil rich with barnyard manure and wood ashes and no one will complain of the size of the Snyder. We have grown it for twenty years and shall continue to plant it, as it usually gives a good picking where many other varieties have failed. This is the standard early sort for the North and Northwest, and is very popular. This was the first of the hardy kinds that made a sensation over the country. With good culture they are large enough to satisfy all. Like old dog Tray, it is ever faithful. The severest frost does not bite it. Grown early; oblong oval in form; quality good.

Price of Snyder Blackberry, 50c. per doz., \$1.50 per 100, \$14.00 per 1000.

PLUM COLLECTION NO. 2

6 TREES FOR 68c.

- | | |
|------------|-----------------|
| 2 Burbank, | 1 Thanksgiving, |
| 2 Lombard, | 1 Reine Claude. |

All trees of medium size, 4 to 5 feet high, 2 years.

PLUM TREES, SPECIAL BARGAIN PRICE 68c.

CERTIFICATE This is to certify that the stock in the nursery of Green's Nursery Co., of Rochester, County of Monroe, State of New York, was duly examined in compliance with the provisions of Section 83, of the Agricultural Law, and it was found to be apparently free from any contagious or infectious disease or diseases, or San Jose scale or other dangerously injurious insect pest or pests. This certificate expires Sept. 1. Dept. of Agriculture, Albany, N. Y.

C. A. WIETING,

Commissioner of Agriculture.

We certify that the whole and every part of said stock has been examined according to the laws of the State of New York, and found free from San Jose scale or other destructively injurious insects, pests or fungus diseases.

GREEN'S NURSERY CO.

**PRODUCTIVE
CURRANT**

Green's receipts
from one-half acre
Red Cross in 1903,
\$537.00; 1904,
\$482.88.

**NEW
RED CROSS
CURRANTS.**

Red Cross Currant is sweet. It is natural to connect sourness with all red currants, since, as a rule, red currants are exceedingly acid, but Red Cross currant is an exception to the ordinary rule, being the sweetest currant ever produced in the way of red currants. I know of no more appetizing or healthful dish than a dish of Red Cross currants at the table to be eaten the same as strawberries, raspberries or other sweet fruit. In calling attention to the characteristics of Red Cross, this qualification of sweetness and palatableness has not been properly emphasized. In making currant jellies, or in preparing currants in other ways, remember the Red Cross currant requires only half the sugar that many other currants require owing to the natural sweetness and fine flavor of Red Cross.

Prof. Maynard, of Amherst College, (Hatch Experiment Station, Mass.,) says Red Cross currant, as seen at Rochester, averages larger than Fay's Prolific, and is more vigorous. Jacob Moore, the originator, to whom we paid \$1250.00, saw it in fruit here and says it is twice as large as Victoria, will yield twice as much as Cherry, and is of better quality than any of the older varieties.

P. C. Reynolds, the veteran horticulturist of Rochester, N. Y., says

that the Red Cross currant averages larger than Fay's or Cherry, and is sweeter than most other varieties. He says that the clusters are longer and that the size of the berry holds out larger to the end of cluster than Fay. C. M. Hooker, the largest small fruit grower in Monroe County, N. Y., says that Red Cross currant as seen at our Rochester place, is larger than Fay's with longer fruit stems. He says the growth is remarkably vigorous, and the plants healthy and free from fungus. He says, "Book my order for 100 plants." **Price of Red Cross, strong,** 2-year-old bushes, 60c. per 10, \$5.00 per 100, \$45.00 per 1000. Strong, 2-year old No. 2 bushes, and strong 1-year-old bushes 50c. per 10, \$4 per 100, \$35.00 per 1,000. See page 42 for other currants and gooseberries.

DIPLOMA GOLD MEDAL CURRANT

DIPLOMA is a late red currant, the largest of any variety that I have ever seen, originating with the veteran Jacob Moore, who originated Red Cross currant, Diamond grape, Brighton grape and Bartlett Seckel pear. It is named Diploma for the reason that it received a diploma for the largest and best currant at the Chicago World's Fair and was awarded a gold medal at the exhibition. Diploma is a vigorous grower and a very productive variety. Like the Red Cross it is not so acid as Cherry and is a little lighter in color, but it is a bright red, attractive currant. It makes excellent jellies and will make a very profitable commercial variety, also be desirable for the home garden. This currant was awarded a gold medal and diploma at the Columbian Exposition at Chicago, also a medal and diploma at the Pan-American Exposition at Buffalo, N. Y.—C. A. GREEN.

Price of Diploma Currant, strong 1-year-old bushes 8c. each, 80c. per 12. Strong 2-year-old bushes 10c. each, \$1.00 per 12, 50 for \$4.00.

W. C. Barry of Rochester, N. Y., says Diploma currant is large, solid and of good quality. It will be valuable for its size and solidity.

What H. E. Van Deman, formerly U. S. Pomologist, says: Diploma Currant was exhibited by Jacob Moore at the Pan-Am., 1901. I was a judge of the first exhibit there, therefore it was my duty and pleasure to examine carefully five baskets of this currant, sent at different dates for a month, some on branches as grown. Diploma currant is of attractive appearance, both clusters and berries being very large. The quality is good. It is a currant of unusual promise.

Brown Brothers, nurserymen, report as follows: We have tested Diploma currant on the table with sugar, and find it of delicious flavor. Considering its extra large size, productiveness and quality, it must become a valuable variety.

CURRANTS AND CURRANT CULTURE

Plant currant bushes in fall or early spring. The currant worm is easily destroyed by dusting with hellebore powder when the leaves first appear.

Fay's Prolific Currant—One of the largest currants, very productive. This has long been a favorite. Price of Fay's: 75c. per 12, \$5.00 per 100, \$40.00 per 1,000, for two-year-old plants.

Champion Black Currant—This is the best of the largest black currants, so popular with our English friends and many others. Price, 2 years old, 50c. per 12, \$4 per 100, \$35 per 1,000.

White Grape Currant—This is the best of all white currants and it should be planted in every garden owing to the great beauty of the fruit as compared with the other red varieties. Price of White Grape Currants: 2 years, 60c. per doz., \$5.00 per 100, \$45.00 per 1,000.

Wilder Currant—This is a new variety, very productive and valuable owing to its being the latest currant we have. It sells high when other currants have ripened and are sold. Price of Red Wilder: 2 years old, 60c. per 12, \$4.75 per 100, \$45.00 per 1,000.

Cherry Currant—This is the oldest large red currant. Not so vigorous as Red Cross. Price for two-year-old Cherry Currants: 60c. per 12, \$4.00 per 100.

Industry Gooseberry—Large red English variety, one of the best.

Price 20c. each, \$2.00 per 12, for strong 2-year-old bushes.

Price of Red Jacket Gooseberry; 2-year bushes 15c. each. \$1.50 per 12, \$12.00 per 100.

Loudon Red Raspberry—This is one of the hardiest red raspberries. It is of large size and very productive. It was introduced several years ago by C. A. Green. It has succeeded in almost every state and territory. Price 50c. per 12, 50 for \$1.25 and 100 for \$2.50.

American Sweet Chestnut, 4 to 5 feet, 50c. each, \$5.00 per 12, 3 to 4 feet, 30c. each, \$3.00 per 12,

Conrath, Early Black-cap Raspberry—It resembles Gregg in many ways, and the fruit retains its large size to the last picking. The canes are of iron-clad hardness, very prolific, and make a good healthy growth. It is one of the best of the very early black-caps. Price of Conrath, 35c. per 12, \$2.00 per 100, \$18.00 per 1,000.

Columbian Raspberry is a new variety much resembling Shaffer in growth of bush, and fruit. A strong grower, unexcelled for productiveness and desirable for canning. At Green's Fruit Farm nine rows, 150 feet long, yielded 66 bushels. Color of the berry purple, like Shaffer. Price of Columbian, 50c. per 12, \$1.75 per 100, \$15.00 per 1,000.

Ruby Red Raspberry—A large and productive variety which we have been testing for several years. It originated on the Hudson River, N. Y. where it has proved to be a great favorite. Price 50c. for 12, \$2.50 per 100.

NUT TREES

Almost every farm contains land that should be planted to nut trees adapted to the soil. Probably no branch of tree cultivation pay larger profits.

Hazelnut (Filbert)—This is the sort usually sold in the fruit stores. Price of Hazelnut, strong bushes, 25c. each.

Pecans—Are hardier than English Walnut, but will not succeed far north. This nut is very productive and delicious. Price of Pecans, 3 to 4 foot trees, 35c. each.

Black Walnut—The common, well-known Black Walnut, the wood of which is most beautiful and valuable. It is very productive in nuts, which are much liked by many. Price of Black Walnut trees, 5 to 6 feet, 50c. each, 4 to 5 feet, 35c. each.

Butternut—A fine native tree producing a large longish nut, which is prized for its sweet, oily, nutritious kernel. Price of Butternut trees, 6 to 7 feet, 50c. each, \$5.00 per 12, 5 to 6 feet, 35c. each, \$3.50 per 12.

THE KANSAS

Kansas Black Raspberry.—Is of the largest size, vigorous, healthy and productive. It is a leading favorite at Green's fruit farm. When I was a boy I delighted to gather the wild black raspberries, but in those days I never met with anything like the Kansas. Fruit is large and excellent in quality. We have fruited it several seasons and find it an excellent variety.—C. A. GREEN.

Price of Kansas Raspberry, 35c. per 12, \$1.50 per 100, \$14.00 per 1000.

THE CUTHBERT RED RASPBERRY. LARGE, PRODUCTIVE, ATTRACTIVE.

This is a valuable variety well tested throughout the country. It has given good results both for home use and market. When it was introduced the demand for plants was far beyond the capacity of any one to supply, and it marked a new era in raspberry growing. Previous to the Cuthbert, red raspberries were a novelty in the market and sold at from fifteen to twenty-five cents per quart. Cuthbert was largely planted, and it succeeded so well as to bring about a lower price for the fruit, which for a time discouraged planters. But the last year or two there has been a great scarcity of red raspberries, and the price has again advanced so that this year the price opened at twenty cents per quart, and did not go lower than fifteen cents per quart even at Rochester, where red raspberries are largely grown. Cuthbert is a good vigorous grower and possesses vitality necessary for a popular variety. It yields bountifully of large and beautiful bright red berries, which are easily picked and always command good prices. No fruit grower can afford to omit planting Cuthbert, and surely no person who has a garden should attempt to get along without red raspberries.

Price of Cuthbert raspberry plants, 50 cents per 12, \$1.25 per 100, \$9.00 per 1000.

Ruby Red Hardy Raspberry, new, larger and better than Cuthbert, price 50c. per 12. \$2.50 per 100.

THE CHAS. A. GREEN NEW WHITE GRAPE

After fruiting this new white grape for several seasons at my Rochester place I am satisfied that it is a valuable variety, a vigorous grower, and an enormous yielder of very large and beautiful clusters of excellent fruit. This variety was sent to me by F. W. Loudon, Janesville, Wis., the originator of Loudon red raspberry, Jessie strawberry, Janesville grape and other valuable fruits. He named it the C. A. Green grape, wishing to honor me for having done him a service in introducing Loudon raspberry and the Jessie strawberry. We have hitherto had trouble in supplying patrons with 2-year-old vines of this variety, but now we have a good stock of very strong vines. Notice that we have reduced the price so that all can afford to plant it.

Price of Chas. A. Green Grape, strong, 2-year-old vines, 15 cents each, \$1.50 per 12, 50 for \$4.50, 100 for \$9.00, by mail or express.

NIAGARA HARDY WHITE GRAPE

Popular everywhere. Bunch very large and handsome, often shouldered, compact; berries large, round; skin thin, tough, does not crack and carries well; has not much pulp when fully ripe, melting, sweet, with a flavor and aroma peculiarly its own, and agreeable to most tastes; ripens with Concord, sometimes a little earlier. Vine very vigorous and productive, succeeding well in all sections. Is largely planted by vineyardists.

Price of Niagara Grapes, 2-year-old vines, 10c. each, \$1.00 per 12, \$7.00 per 100, \$50.00 per 1000.

Regal Long Keeping Red Grape—If you want the longest keeping grape, one that you can eat during fall and winter months, plant the Regal. Its quality is equal to Catawba or Ulster. Regal grape keeps well owing to its tough skin and persistent nature, keeping in fine condition late in the season. I believe it will be a good shipper. C. A. Green says it is splendid for home or market. Good in every way and a long keeper.

Price of 2-year vines of Regal Grapes, 25c. each, \$2.50 per 12.

CONCORD—Monarch of Hardy Grapes.

Concord Grape.—This hardy black grape is decidedly the most popular grape in America, and deservedly so. Bunch large, shouldered, compact; berries large, covered with a rich bloom; skin tender, but sufficiently firm to carry well to distant markets; flesh juicy, sweet pulp, tender; vine a strong grower, very hardy, healthy and productive. For general cultivation the most reliable and profitable variety.

Price of Concord Vines: 2-year, 10c. each, \$1.00 per 12, \$7.00 per 100, \$45.00 per 1000.

Worden Grape.—If you fail to plant Worden grape you will make a mistake. When it was first introduced it was claimed to be the same as Concord, since it resembles Concord in many respects. It is, however, much earlier than Concord in ripening and larger in size of berry. Its earliness of ripening is a strong point over Concord. It will not ship, however, so well as Concord, being tender in skin, but for home use I know of no grape of greater value.

Everyone plants it. It is an enormous cropper and its vines are vigorous enough to ripen such crops, but the more fruit a vine carries the later will it ripen its fruit. Worden is ripe and gone before Concord comes in. It is an early black grape, very large in cluster and berry, of good quality, selling well everywhere. In brief, Worden is an improved Concord, being larger in both bunch and berry, handsomer, nearly two weeks earlier, and of better quality. Surely this is enough to please all. If only one grape vine can be planted, plant the Worden.

Price of Worden Grape: Strong vines, 2-year, 10c. each, \$1.00 per 12, \$7.00 per 100, \$50.00 per 1000.

GRAPE VINES AT A BARGAIN

12 VINES FOR 98c

One-third off regular price. Must be sold

We offer 3 Worden, black; 3 Concord, black; 1 Campbell's Early, black; 2 Regal, red; 3 Niagara, white; all 2-year-old, first-class grape vines for 98 cents, regular price being \$1.35.

Moore's Early.—Clusters of medium size; berries large, round, black, with heavy blue bloom. Desirable for market on account of its earliness, well suited for Canada and northern portions of the United States.

Price of Moore's Early—2-years, 15 cents each, \$1.50 per 12, \$7.00 per 100.

Diamond White Grape—This is our choice in white grapes. It is an excellent variety for those having only a small garden or those desiring to plant for market. In growth of vine it is marvelous and seems adapted to all localities where grapes are grown. It is a diamond among grapes. Extremely hardy; vine a vigorous grower; foliage large and healthy. Very prolific in bearing; cluster large and handsome.

Price: Diamond Grape, strong 2-year vines, 15c. each, \$1.50 per 12, \$10.00 per 100.

ADDITIONAL VARIETIES

Brighton—15 cents each, \$1.50 per 12.
Campbell's Early—15 cents each, \$1.50 per 12.
Delaware—15 cents each, \$1.50 per 12.
Diamond—15 cents each, \$1.50 per 12.
Agawam—15 cents each, \$1.50 per 12.
McPike—Black, very large, 25 cents each.

BARGAINS IN PLUM TREES See Page 8

Downing Gooseberry is the largest and best of all native American varieties; see illustration above. This valuable variety originated with Charles Downing, greatest of all pomologists. The value of Downing lies in its large size, fine quality, beautiful appearance, vigorous growth, and freedom from mildew. This variety is recommended as proof against mildew. Downing is free from spines, of a transparent color, tending to yellow; bush upright, keeping the fruit from the sand. Downing is enormously productive. Surely planters of gooseberries have overlooked the great value of the Downing. Since plants of Downing can be produced in America, and plants of foreign varieties cannot, Downing plants can be sold at a lower price, which is another inducement for planting. In order to make the Downing gooseberry known to our patrons we mark herein perhaps the lowest price ever made for such strong, vigorous plants. An acre of Downing can be made to yield \$500. It is unsurpassed for canning. It is easily harvested by stripping the branches with a gloved hand, enabling the picker to gather many bushels in a day. The winnowing of leaves is done by an ordinary fanning mill, the same as beans. They can be shipped from Maine to California like marbles.—C. A. GREEN.

Price of Downing Gooseberry: 2-year-old bushes, first-class, 10c, each, \$1.00 per 12, \$7.00 per 100.

Industry Gooseberry—This is a large red English variety which has succeeded better in this country than any other foreign variety. It is very productive and the fruit is of superior quality, selling well in the market and being desirable for family supply. It will succeed better when partially shaded by a fence or tree.

Price 20c. each, \$2.00 per 12, for strong 2-year-old bushes.

Price of Red Jacket Gooseberry: 2-year bushes 15c. each, \$1.50 per 12, \$12.00 per 100.

GREEN'S GUARANTEE.—We will replace free or refund the amount paid us for any stock not true to name but are not liable for other damages. All shipments travel at the risk and cost of purchaser.

MAILING SIZE APPLE TREES

Many of our patrons live at distant points where railroad charges would deter them from ordering, hence we offer mailing size apple trees. American Blush, Banana, Green's Baldwin, Bismarck, Wismer's Desert, Gano, Ben Davis, Grime's Golden, Jonathan, Rome Beauty, Wine-sap.

For prices on above see page 62.

No Strawberry
plants dug for
Fall orders.
Plant in Spring

GREEN'S BIG STRAWBERRY—CORSICAN.

Corsican, biggest berry on earth—This is C. A. Green's favorite strawberry. We have sent it out by the hundred thousands to every postoffice from the Atlantic to the Pacific oceans. It is a great strawberry for many reasons. First, it is the biggest berry; second, it is the brightest and best in color; third, it is a great yielder and producer; fourth, and most important of all, the foliage is exceedingly vigorous and leathery, resisting fungus, drought, weed and even neglect of cultivation. Price of Corsican layer plants, 25c. per 12, 75c. per 100, \$6.00 per 1000.

Senator Dunlap—At Green's fruit farm it has no superior as an early variety. It is an all round, rough and ready producer, sturdy plant and heavy cropper of best quality berries. With clean, healthy foliage which has no tendency to rust. The berries are very large, roundish conical, regular, with slight neck. In color, they are glossy crimson, with the meat firm and solid, deep crimson throughout, and good in quality. Price of Senator Dunlap, layer plants, 25c. per 12, 75c. per 100, \$6.00 per 1000.

Brandywine—A very late and firm berry; a good shipper, good canner; a good all round strawberry. This strawberry is being largely planted. In plant it is a luxuriant grower, healthy and very productive; blossom perfect, fruit large, of good form, bright red all over, and good quality. Price of Brandywine, layer plants, 25c. per 12, 75c. per 100, \$6.00 per 1000.

Green's Pineapple Flavored Strawberry—If you want a good flavored strawberry, one of the greatest yielders of large and beautiful fruit, plant Pineapple flavored strawberry. It was introduced by us. We are confident you will be surprised and pleased with this variety when you see it fruiting upon your place. Price of Green's Pineapple Flavored Strawberry, layer plants, 25c. per 12, 75c. per 100, \$6.00 per 1000.

Cardinal (Imp.)—The plant is perfect, large and luxuriant, and sends out many sturdy runners, which take root readily and make strong plants. The leaves are smooth and handsome, and very large and thick, furnishing abundant shelter for the blooms and berries. The fruit is large, though not the largest, nearly round, obtusely pointed, and beautifully smooth and uniform. The color is a rich, brilliant red—no white or green tips—a heavy cropper. Price 25c. per 12, 75c. per 100.

ASPARAGUS THE BEST EARLY VEGETABLE.

PALMETTO ASPARAGUS GROWING THE LARGEST STALKS READY TO CUT.

Palmetto Asparagus.—This is a large growing variety particularly delicious in quality. No home garden can be complete without it. Asparagus is one of the greatest garden delicacies, coming in at a season when there is no competitor. When once planted this will continue to produce abundantly for life. The plants late in the season are objects of great beauty, and are worth growing for their beauty. Palmetto Asparagus is valuable for its health-giving properties. It is also appetizing and is a rare delicacy for any table.

Price of Palmetto Asparagus: Strong 2 year plants, 30c. per 12, 60c. per 100, \$4.00 per 1000. Asparagus plants will be sent by mail postpaid at dozen rates, and in 100, if 20 cents is added to the 100 price.

RHUBARB, OR PIEPLANT, FOR FAMILY OR MARKET.

We have millions of well-rooted Rhubarb plants for sale. Our propagator had such good success it looks as though we could supply the world. We are glad that we have this big supply on hand for the reason that we believe that these Rhubarb roots, when planted in the gardens of our friends and patrons, will prove a blessing. Rhubarb is one of the most healthful foods known. When spring opens the human system needs an acid. Fruits have not yet supplied these acids, therefore rhubarb, or pieplant, is the only source. Those who eat pieplant pie and sauce freely are greatly benefited. Do you realize what excellent sauce can be made of rhubarb?

Have you a bed of pieplant in your garden? If not do not fail to start a bed this spring. I prefer to plant a solid row of pieplant running. This row will not prevent plowing and cultivating the garden with a one-horse cultivator, and the row will not be in the way nearly as much as a bed devoted to pieplant. Pieplant is one of the most easily transplanted of all plants. It is sure to grow, and once planted will continue to produce an abundant supply for the family for life. The richer the ground the more luxuriant the growth, and the longer the stalks. Set 12 to 18 inches apart in the row. For ornament alone it pays to plant it.

Children playing hiding-go-seek behind Green's strong growing Rhubarb.

Price of strong Pieplant roots, lower than ever before, 10c. each, \$1.00 per 12, \$5.00 per 100.

ASPARAGUS THE BEST EARLY VEGETABLE.

Asparagus Culture.—Plant in rows $3\frac{1}{2}$ feet apart, and one foot apart in the rows. Let the lower ends of roots extend down as far as they can, but do not cover the crowns deep at planting. Plant by opening a trench or furrow. Lay the plant on the side of the trench, with the top or crown 3 inches from the surface. Then cover roots and crown, but see that the crown is covered but slightly, or it will rot. As the new shoots come up you can fill up the trench and cover over the crown. The ideal conditions would be a deep sandy loam with easterly, southeasterly or southwestern slope, as warm as possible and sheltered from prevailing cold winds.

CONOVER'S COLOSSAL ASPARAGUS READY FOR COOK AND MARKET.

Cut used by permission of Bradley Fertilizer Co.

Conover's Colossal Asparagus.—There is probably no vegetable that is so absolutely superb to the delicate appetite of the epicure as the first delicious cuttings of this early asparagus, and no vegetable more beneficial as an appetizer to persons of sedentary habits, and it is difficult to account for its cultivation being so much neglected by the community at large. In country gardens it is more rarely to be found than any other vegetable, although so healthful and nutritious; yet everyone who knows anything about gardening, having a plot of ground, should have an asparagus bed. This good old variety is known everywhere; is of large size, rapid in growth and of good quality. Grown on black muck land on our grounds at Clifton, it is mammoth in size and continues to give good cuttings for a long season.

Price of Conover's Colossal Asparagus: Large 2 year plants, 25c. per 12, 60c. per 100, \$4.00 per 1000.

Horse Radish.—Will stand a great deal of hardship and will persist in soil year after year. Plant in deep, rich, cool soil. The yield will vary according to the soil and treatment. As high as ten tons have been secured from an acre.

Price: Strong Sets, 25 cents per 12, 75 cents per 100.

Sage (Holt's Mammoth).—Price, large bushy plants that have been grown in the nursery row, 10c. each, \$1.00 per 12, \$5.00 per 100. These plants by mail 12c. each, doz. \$1.20.

GOLDEN GLOW BACK OF PHLOX

Golden Glow is the best yellow flower. It comes up each year like the pæonie. See page 57. Price 5 cents each, 35 cents per 10.

CAROLINA POPLAR.

Price 6 to 8 feet 20c. or \$12 per 100.

CAROLINA POPLAR TREES.

There is nothing which grows faster or makes a finer display than Carolina Poplars. Aladin's palaces were not erected more rapidly. You plant the tree now and immediately you have shade and shelter; the leaves are large, luxuriant and beautiful. If there are barns or other buildings on your place that you wish to shield, plant Carolina Poplars.

Green's special low price on Carolina Poplars 6 to 8 feet high, is 20c each, carefully packed.

GREEN'S GRAPE COLLECTION.

Six grape vines, one Diploma Currant, one Red Cross Currant and one Live-Forever rose bush for 75c. The varieties of grapes to be as follows:

- 2 Worden Early black grape,
- 2 Concord Medium early black grape,
- 2 Niagara superior white grape,

Notice all the above for 75 cents

THE CAROLINA POPLAR TREE.

CAROLINA POPLAR TREE—BEST OF ALL
♦ POPLARS—PLANTED TWO YEARS.

This is the best, most beautiful and most desirable of all poplar trees. While a vigorous and rapid upward growing tree it does not shoot upward like a church steeple as does the Lombardy. The Carolina grows as rapidly as the Lombardy Poplar but it makes a more wide spreading tree. It is more like the maple or the oak, and is therefore more desirable as a shade tree and a wind break. The leaves of the Carolina Poplar are much larger than those of the Lombardy Poplar. Trees of the Carolina Poplar cost no more than that of the Lombardy Poplar and we recommend them with confidence to the patrons of the Green's Nursery Co. Carolina Poplar may be planted on the borders of a home lot or in a row 10 or 12 ft. apart on the western border as a wind break. Every orchard needs a wind break and nothing is better and nothing grows more rapidly than the Carolina Poplar. You will want rapid growing trees to hide your barns and other outbuildings, so that they cannot be so plainly seen from the house and from the road. Nothing is better for this than the Carolina Poplar. Don't fail to notice that we offer these Carolina Poplar trees, 6 to 8 feet high at 20c. each, \$2.00 per 12, and \$12 per hundred. Remember it is not necessary to buy the large trees of the Carolina Poplar since they grow so rapidly. Medium size trees are as desirable as the large size and freight can be saved in buying moderate sized trees.

Our C. A. Green says of Carolina Poplar: For a quickly growing shade tree, there is no tree which equals the Carolina Poplar. It is broadly pyramidal in form, very robust in

growth, with large, glossy, deep green leaves. It stands the smoke and dust of the city streets better than any other shade tree. Very useful for planting as a screen to shut out unattractive buildings.

Price of Carolina Poplar trees 10 to 12 feet high, 30c. each, \$3.00 per 12, \$20.00 per 100. 8 to 10 feet, 25c. each, \$2.50 per 12, \$15.00 per 100. 5 to 6 feet 15c. each, \$1.50 per 12, \$10.00 per 100. 6 to 8 feet, 20c. each, \$2.00 per 12, \$12.00 per 100.

Ruby Red Raspberry—

This new hardy red raspberry has been well tested at Green's Fruit Farm where we have grown it for market for several years. It is larger, a better grower, and yields more quarts per acre than Cuthbert

which is saying a good deal. C. A. Green says do not fail to plant the Ruby Raspberry.

Price 50c. per 12, \$2.50 per hundred.

Lombardy Poplar known everywhere, owing to its tall, pyramidal growth. This tree has been largely planted. These trees are often desired for planting in front of objectionable out-buildings, or to screen unsightly outlooks.

Price of Lombardy Poplar Trees: 6 to 8 feet, 20c. each, \$2.00 per 12. 8 to 10 feet, 35c. each, \$3.50 per 12.

Norway Maple—This is one of the hardiest ornamental shade trees, and of the most beautiful. It makes more of a wide spreading tree than the sugar maple. Price of Norway Trees: 8 to 10 feet, 75c. each, 6 to 8 feet, 50c. each.

Thorn, Double White—Has small, double white flowers. A highly ornamental variety, on account of both foliage and flowers. It makes a very striking contrast when planted with the double scarlet.

Price of White Thorn Trees, 50c. each.

Thorn, Paul's Double Scarlet—Flowers are bright carmine red. Superior to any of its color. Price of Red Thorn Trees, 50c. each.

For apple trees see page 26. For Sweet Chestnut see page 42—30c. to 50c. each. Ruby Red Raspberry—new, large, fine, see page 42. For Golden Glow see page 1.

AMERICAN ELM.

American Elm—The most admired of all American trees. It is very attractive in any suitable location, is entirely hardy and easily transplanted. There are more Elm trees planted along our streets and highways than any other one variety. This on account of its dense green foliage, which spreads out from overhead, covering a suitable space of ground in proportion to the size of the tree, which makes it the finest shade tree in the world. We have a large stock of these handsome and most beautiful trees.

Price of American Elm: First-class trees, 6 to 8 feet high, 35c. each, \$3.50 per 12; 8 to 10 feet high, 50c. each, \$5.00 per 12.

SILVER MAPLE TREE—an attractive silvery tinge. Succeeds well on all soils. Price of Silver Maple trees: 8 to 10 feet, 50c. each, \$5.00 per 12; 6 to 8 feet, 40c. each, \$4.00 per 12.

Silver Maple—This is one of the best quick growing shade trees. It is beautifully ornamental if given room to develop, and is particularly useful on very wide streets and avenues. Foliage is of

SUGAR OR ROCK MAPLE TREE.

Sugar or Rock Maple—This native tree of ours is a universal favorite for street planting, and desirable everywhere. It is considered a slow grower, but is long-lived. If planted in sod all trees or shrubs should be kept mulched for a year or two for best results. Price of Sugar or Rock Maple trees, 6 to 8 feet, 40c. each, \$4.00 per 12; 8 to 10 feet, 50c. each, \$5.00 per 12.

HARDY CATALPA.

Hardy Catalpa—One of the most showy flowering trees. The flowers have a pleasant fragrance, and a tree in bloom attracts the sense of smell and sight. It makes a beautiful object on a lawn and should be in everyone's dooryard. Price of Hardy Catalpa trees: 8 to 10 feet, 50c. each, \$4.50 per 12; 6 to 8 feet, 35c. each, \$3.50 per 12.

Norway Spruce Hedge.—The cut herewith shows a hedge of Norway Spruce in Mt. Hope Cemetery, with cut-leaf weeping birch trees in the background. There is no evergreen so largely planted as the Norway Spruce. It is indeed a tree possessed of great beauty at all seasons, particularly in winter when its branches are weighed down with snow.

The trees may be planted eighteen inches to two feet apart for hedges, but if planted three feet apart they will in time occupy all of the space. Norway Spruce is often used as a lawn fence between village or city lots. It can be planted most effectively in groups on the lawn, planting far enough apart to give each tree an opportunity to expand itself in its beauty. It is as often planted as single specimens, and planted in this way it has few superiors as an ornamental tree, growing to great size. There are many who do not realize the value of this grand evergreen for ornamental and practical purposes.

Were its value known as it merits, there would not be enough in stock in all the nurseries in the United States to supply the demand. In all bleak places, where nothing else will grow, or in other situations where needed, plant Norway Spruce.

Price of Norway Spruce, 18 to 24 inches, 15c. each, \$1.75 per 12, \$12.00 per 100. 2 to 3 feet, 25c. each, \$2.50 per 12, \$20.00 per 100.

WONDERFUL RUSSIAN MULBERRY TREE.

Our C. A. Green is delighted with the fruit of the Russian Mulberry. Though the picture was made from a photograph, the artist has not shown one-tenth part of the number of mulberries to be found upon one of these trees. I particularly recommend the Russian mulberry for poultry keepers, since the trees are perfectly hardy, free from insects, and bear large quantities of berries which are continually dropping and being eaten by the chickens. Prof. John Craig, heartily recommends the Russian mulberry on account of its hardiness.

Price of Russian Mulberry Trees: 4 to 5 feet, 25c. each, \$2.50 per 12; 5 to 6 feet, 35c. each, \$3.50 per 12.

The Cut-Leaved Weeping Birch—This noble tree is not only the most popular of the weeping trees, but it is decidedly the best. Its tall, slender, yet vigorous growth, graceful, drooping branches, silvery white bark, and delicately cut foliage, present a combination of attractive characteristics rarely met with in a single tree. Price of Cut-Leaved Weeping Birch, 4 to 6 foot trees, 75c. each.

White Flowering Horse Chestnut—In early spring these trees are completely covered with beautiful flowers. We think there are but few who realize how beautiful are the flowers of the horse chestnut. When autumn comes, the large red nuts cover the ground, to the delight of the children. Price of Horse Chestnut trees, 4 to 6 feet, 50c. each.

European White Birch—This attractive ornamental tree is suitable for decorating the lawns, parks and drives; of graceful form, silvery bark, slender branches, and light and airy foliage, render them general favorites.

Price of European White Birch, 6 to 8 foot trees, 50c. each.

Wier's Cut-Leaved Maple—One of the most remarkable and beautiful trees, with cut or dissected foliage. Its growth is rapid, shoots slender and drooping, giving it a habit almost as graceful as cut-leaved Birch. Price of Wier's Cut-Leaved Maple trees, 6 to 8 feet, 50c.

P. Pissardi, (Purple Leaved Plum)—The finest purple-leaved small tree or shrub. The young branches are a very dark purple; the leaves, when young are lustrous crimson, changing to a dark purple, and retain this.

Price of Prunus Pissardi, first-class, 50c. each.

Golden Willow—A handsome tree. Conspicuous at all seasons, but particularly in the winter on account of its yellow bark.

Price of Golden Willow, first-class, 5 to 6 feet, 35c.

American Linden or Basswood—A rapid growing, large-sized, beautiful native tree, with very large leaves and fragrant flowers. Price of American Linden trees, 6 to 8 feet, 50c. each.

Purple Leaf Beech—The blood-leaved tree possesses all the qualifications of an ordinary beech, and in addition has beautiful red leaves which continue red throughout the season. Price of Purple Beech trees, 3 to 4 feet, 75c.

New Hardy Lilacs comprising twenty named varieties. These are beautiful shrubs, indispensable in every collection, which we offer in double and single blossoms. In colors we have double and single white, double and single purple, double and single violet, pink and other colors. **Price of New Hardy Lilac Bushes, 50c. each, \$5.00 per dozen.**

Old Homestead Lilac—There are no flowering plants more highly prized than this beautiful pink lilac. The Old Homestead Lilac is not claimed to be a new variety. It is a choice variety found in an old garden at Green's fruit farm. **Price 25c. each for strong well-rooted plants.**

Lilac, Purple—The well-known variety, one of the best. A good grower; flowers and young wood fragrant; purple. **Price, large size plants, 25 cents each.**

Lilac, White—A very desirable contrast to the purple; those who have one should have the other. **Price, large size plants, 50 cents.**

Spiræas, these are elegant low shrubs of the easiest culture and their blooming extends over a period of three months. We have these Spiræas in assorted colors, white, pink, red, double white and rose. Order by color. **Price of Spiræa, 25c. each, \$2.50 per 12.**

Mock Orange—Flowers white, deliciously perfumed. Derives its name owing to flowers resembling orange blossoms; a delightful substitute for that noble flower. **Price of Mock Orange, 25c. each, \$2.50 per 12.**

White Fringe—A popular and much admired shrub of moderate growth and rounded form, with large, dark green, glossy leaves, and long drooping panicles of beautiful white fringe-like flowers. **Price of White Fringe, strong plants, 25c. each, \$2.50 per 12.**

Purple Leaved Barberry—A beautiful shrub with violet-purple foliage; showy, small yellow flowers, and beautiful red berries in pendulous clusters. **Price of Purple-Leaved Barberry, strong bushes, 25c. each, \$2.50 per 12.**

Forsythia Viridissima (Golden Bell)—From China. A fine, hardy shrub of spreading habits and straggling growth. It comes into bloom early, and flowers are of a bright orange-yellow. **Price of Forsythia, large, 25c.**

COMMON SNOWBALL.

Snowball (Virburnum).—A well-known favorite shrub, with globular clusters of white flowers the latter part of May.

Price of Snowball, strong bushes, 20c., \$2.00 per 12.

Weigelas, Attractive Flowering Shrubs.

Weigela Rosea.—This is one of the most charming shrubs in cultivation; it cannot be too highly recommended; the flowers are large and of a deep rosy color, and are borne in great profusion. We offer them in different colors, Rosea, red, pink and white.

Price of Weigelas, strong plants, 25c., \$2.50 per 12.

DEUTZIA, WHITE

ORNAMENTAL GRASSES

Ostrich Plume grows as high as four feet, and a single plant may measure across its top three or four feet. Is easily transplanted and almost sure to grow.

Price of Ostrich Plume—Plants by mail or express, 10c. each, 75c. per 12.

Deutzia, Pure Double White—A variety having double flowers which are white, tinged with pink, and which are produced in racemes from 4 to 5 inches long in great profusion.

Deutzia, Pride of Rochester, is a variety raised and introduced by Ellwanger & Barry, and blooms a week earlier than the other varieties. The flowers are large, double white, slightly tinged on the back of the petals with rose.

Deutzia Rosea—Red flowering, very attractive and should be included in every collection.

Prices of all the above varieties of Deutzias, large flowering bushes, 25c. each, \$2.50 per 12.

Green's Nursery Co.—The box of trees came to hand safely. They are the finest lot of trees and shrubs I ever set out. J.G.S. Wolfville, Can.

Variegated or Striped Grass—This is a grass we grow on account of its being so pretty. It pleases us well for borders of flower beds, walks or a row here and there to change the monotony of the garden or field.

Price of Striped Grass—Strong sets, 5c. each, 20c. per doz., \$1.00 per 100.

Hardy Hydrangea.—We urge our friends to plant the Hydrangea. There is nothing that will gratify you, who love beautiful objects, more than this. We advise you to plant it for the following reasons: It is perfectly hardy, enduring the severest winters out of doors without protection. It is easily transplanted, not one in a thousand dying; it never fails to blossom the first year planted; no matter how small the plant, it immediately buds out in great profusion of flowers, many of them as large as the head of a full grown child. It is thus attractive immediately after planting, gaining in beauty each year for ten or twenty years if properly pruned. It remains in blossom the longest of any flower, a single blossom remaining in beauty for nearly a month. We have plantations of these flowers that delight the beholder for a month at a time. When the specimens first open they are greenish white, later they turn to a pure white, and still later to a delicate pink hue. The Hydrangea should be cut back at least one-half of each season's growth in order to get the largest specimens. If the branches of the bush are cut down nearly to the ground, it will not injure it, and the most beautiful specimens will be produced the same season. It can be grown in tree form to a single branch. To get the best results, make the soil very rich, but it will grow anywhere and on any kind of soil. There is no plant on earth that I can recommend with greater confidence than the Hydrangea. It can be mailed safely anywhere.—C. A. GREEN.

HARDY HYDRANGEA PANICULATA GRANDIFLORA,
KING OF SHRUBS.

Price, by mail, postpaid, 25c. each; larger, by express or freight, 25c. each, \$2.50 per 12; extra large, 35c. each, \$3.50 per 12.

CALIFORNIA PRIVET FOR HEDGING.

The Greatest of all Hardy Hedge Plants.

The City of Rochester, N. Y., is one of the most beautiful in the world. On almost every lot California Privet hedges are planted to divide one lot from another. This Privet hedge is also planted in front of most houses adjacent to the street. The Privet hedge is easily kept at any height desired. In many cases the hedge is not allowed to grow over 2 feet high; in other cases the hedge may grow as high as 4 to 6 feet. California Privet hedge has no thorns, does not sucker from the roots and is not objectionable in any way. This hedge holds its foliage nearly all winter. It is almost an evergreen.

and offer it at the very low price as shown below. It has a beautiful white blossom, something like a white lilac. It is not so rank a grower as a locust or the spruce, and does not spread so wide or occupy so much ground as many other hedges. Therefore it is popular in city and village planted on the streets or between small building lots.

50,000 Home Grown Privet, Price, heavy, 2 year, well branched \$3.00 per 100, \$25.00 per 1,000. Extra heavy 3 to 4 feet, transplanted, \$4.00 per 100, \$35.00 per 1,000.

WE HAVE THOUSANDS OF FLOWERING SHRUBS, VINES AND ORNAMENTAL TREES.

If you do not find what you need in this catalogue, write us for prices. We can save you money on anything you might need.

Golden-Leafed Elder

Makes An Attractive Border Shrub.

Golden-Leafed Elder—The best of all the colored shrubs. A plant of this bush in a bed, or a border, or on the lawn, is a conspicuous feature, the foliage being as yellow as gold. Price of Golden-Leafed Elder—Strong plants, 25c. each, \$2.50 per 12.

Tree Cranberry—This is an attractive and profitable fruit. Hardy as a rock and most desirable, combining the ornamental with the useful. Its beautiful red fruit clings to the branches in winter.

Price of Tree Cranberry, large bushes, 25c. each.

Althea (Rose of Sharon, Tree Hollyhock), When in full bloom the Althea is ablaze with blossoms. We have the Altheas in different colors, pink, purple, white, and pink and white.

Price of Althea, strong bushes, 25c. each.

HARDY FLOWERING VINES.

HENRYII AND JACKMANNI CLEMATIS

Ampelopsis Veitchii (Boston Ivy)—This is one of the most beautiful ivies, rapid grower and clings tenaciously to brick or stone walls. It is hardy and thrives almost everywhere. Price of Ampelopsis Veitchii, strong vines, 35c.

Trumpet Vine—The reader may be surprised to learn that the Trumpet Vine may be made to grow like a tree, and is very beautiful when grown in this way. Plant the Trumpet Vine in an open space on the lawn and train a single shoot to a strong stick.

Price of Trumpet Vine, strong plants, 20c. each, \$2.00 per 12.

Jackmanni Clematis—We consider this by far the best Clematis—takes to transplanting better, blossoms more. Flowers, when fully expanded, are from 4 to 6 inches in diameter, intense violet purple, with a rich, velvety appearance. Price of Jackmanni Clematis, strong plants, 35c. each, \$3.50 per 12.

Henryii Clematis—A vigorous grower and free bloomer, producing its large, pure white flowers constantly during the summer and early autumn. Price of Henryii Clematis, 35c., \$3.50 per 12.

Halleana (Hall's Japan Honeysuckle)—An almost evergreen honeysuckle of the greatest value, being hardy and of strong growth. The flowers are fragrant, of a pure white, changing to yellow. Price, strong plants, 20c.

ROSES.

The Rose has always been a favorite among plant lovers, and time seems but to enhance its beauty and popularity.

CRIMSON RAMBLER HARDY CLIMBING ROSE.

Crimson Rambler—A climbing rose of unusual attractions. Very hardy, having withstood to degrees below zero without covering. Vigorous in growth, having grown 8 to 10 feet in a season. Produces a profusion of blossoms, having been known to produce 300 blossoms on one shoot. The Crimson Rambler is especially adapted for covering trellises. Its clustered form, its brilliancy, the abundance of its bloom, and the great length of time the flowers remain on the plant without falling or losing their brilliancy, are qualities which make this rose an assured favorite. Price of Crimson Rambler Rose bushes, 2 years, 25c. each, \$2.50 per 12, \$18.00 per 100.

COLLECTION NO. 2. 6 ROSE BUSHES FOR 90 CENTS,

POSTPAID.

We will send postpaid six strong Rose Bushes to include 2 Live-Forever, 1 Crimson Rambler, and 3 of our choice of varieties. Regular price \$1.20.

Special Bargain Price, 90 cents postpaid.

COLLECTION NO. 3. 10 ROSE BUSHES FOR 75 CENTS POSTPAID.

We will mail you postpaid 10 Live-Forever Hardy Rose Bushes, all well rooted and should blossom this year.

10 Bushes for 75 cents Postpaid.

Live For-Ever Rose—We are making a specialty of this rose, it bloom the first year planted,

Coquette des Alps—White, slightly shaded with carmine; strong grower and a great favorite. This variety is very valuable; it continues to give a profusion of blossoms for weeks after general varieties have finished.

Price 25c. each, \$2.50 per 12.

Dorothy Perkins—A most valuable Pink Rambler Rose. Of a most beautiful shell-pink color. In hardiness, nothing more could be desired. Flowers are very double, of large size, usually two inches across and borne in loose clusters. The petals are very prettily rolled back and crinkled; the buds are remarkably handsome, being pointed in shape and of just right size for the button-hole. Price 25c. each, \$2.50 per 12.

ROSE COLLECTION NO. 1.

6 ROSE BUSHES FOR 98 CENTS.

Varieties are as follows: selected for hardiness and freedom of bloom; 2 Live-Forever Pink rose, 1 Madam Peautier, 1 Dorothy Perkins, 1 Magna Charta, 1 Crimson Rambler. All large, 2-year-old bushes which will bloom the coming summer. Regular price \$1.40. Special Bargain Price, 98 cents.

Baby Rambler—A dwarf (Bush) form of Crimson Rambler, and furthermore, Ever-blooming. Will bloom continuously throughout the summer if planted out-of-doors. Has the same bright crimson color as the climbing Crimson Rambler, and blooms in clusters of 20 to 40 flowers at one time on plants of fair size. "Baby Rambler" is one of the best Roses for bedding. Price of Baby Rambler Rose Bushes: Strong 2-year, 35c. each, \$3.50 per 12. Small or mailing size, 2-year Bushes, 25c. each, \$2.50 per 12.

LIVE FOREVER ROSE

A Bug-Proof, Hardy Rose—If you have tried growing roses and failed, try once more, for we have discovered a rose which lives long and is proof against insects and diseases. It is as easy to grow this variety as lilacs, corn or sunflowers.

I recommend this rose to all, especially to those who have not been able to succeed with roses. Plant it in large beds and you will have a display of bloom that will attract attention and admiration. Plant it in the form of a hedge-row and you will have something attractive and unique. You can train it low or high as you desire. Live-Forever Rose can be trained as a climbing or as a bedding rose, or it can be trained to a single stalk like a rose tree.

Price of Live-Forever Rose, strong, well-rooted 2-year bushes, 15c. each, 12 for \$1.50, 50 for \$5.00. 1-year bushes, or mailing size, suitable for hedges, 10c. each, \$1.00 per 12, 50 for \$4.00, 100 for \$7.50.

LaFrance—Silvery rose, with pink shades and satin-like petals of unsurpassed beauty; large, symmetrical and deliciously fragrant: blooms from June until frost; hardy with protection. A universal favorite. One of the most constant bloomers, flowering continually all the summer in the open ground. **Price 25c. each, \$2.50 per 12.**

Margaret Dick-on—White, with pale flesh center; petals very large, shell-shaped, fragrant, a fine variety; foliage very large, dark green. The finest white rose grown. **Price 25c. each, \$2.50 per 12.**

Anne de Diesbach—Carmine, a beautiful shade; very large. A superior garden sort; fragrant; one of the hardiest. **Price 25c. each, \$2.50 per 12.**

Baltimore Belle (Climber)—Pale blush, large, very double; one of the best climbers. **Price 25c. each, \$2.50 per 12.**

Madame Plantier—Pure white, above medium size; full. Produced in great abundance early in the season. Foliage, rather small, seven leaflets. One of the best white roses for hedges and for massing in groups. **Price of Madame Plantier, 25c. each, \$2.50 per 12.**

Gen. Jacquemihot—Deep, brilliant shaded crimson, with large petals, globular with high center. **Price 25c. each, \$2.50 per 12.**

LIVE-FOREVER ROSE, GROWN AS A CLIMBER.

Mrs. John Laing—A beauty in clear, bright, shining pink; each bud in its long, serrated calyx with adjacent green foliage, forms a dainty and lovely boutonniere; immense, full blooms on long, stiff stems; sweetly scented. A good grower, constant bloomer, and hardy. **Price 25c. each, \$2.50 per 12.**

Magna Charta—A general favorite, prized on account of its strong, upright growth and bright, healthy foliage, as well as for its magnificent bloom. The color is beautiful pink, suffused with carmine. **Price 25c., \$2.50 per 12.**

LIVE-FOREVER ROSE, GROWN AS A HEDGE. IT BLOOMS FIRST AND EVERY YEAR.

Yucca Filamentosa.—I know of no flowering plant more showy than this. The plant itself looks something like the Century plant, and is mistaken by many for the Century plant. It is a gorgeous grower and endures the most severe winters without protection. It blossoms year after year, perhaps for a lifetime, as shown in the above illustration, and its blossoms look something like lily blossoms. They are pure white, and remain a long time in bloom. Sometimes the blossom stalk is thrown up to the height of 5 to 6 feet, making one of the most showy and conspicuous flowering plants in existence.

YUCCA—ADAM'S NEEDLE, HARDY CENTURY PLANT.

PERENNIAL PHLOX.

The Yucca is a rare plant, is easily transplanted and should be in every selection.

Price of Yucca—Strong plants, 25c. each, \$2.50 per 12.

Perennial Phlox.—Finest autumn flowers. Plant roots of the Phlox in fall or spring and those roots will continue to send up flower shoots each spring for twenty years. The bunch of roots, however, will after four or five years become so large as to be improved by dividing the cluster of roots, making, perhaps, a dozen transplants from one cluster, planting those out in a new bed, or a new row. Nothing transplants easier and there is no flower grown which can be produced in abundance with so little trouble. I plant the Phlox in a row along the border of the roadway, in a bed made up of several rows, or in a round bed on the lawn, or in single clumps here and there among the flower beds, or in the shrubbery. Every one who visits Mr. Green's place admires these beautiful plants of Phlox. The Phlox is hardy everywhere, and succeeds everywhere, and on all soils. *We offer three colors: Pink, white and red.*

Price of Phlox—Strong plants, 15c. each, \$1.50 per 12, \$12.00 per 100.

A CLUMP OF PÆONIES.

Pæonies.—This old and popular flower has again come into great favor. It is certainly worthy of a revival in its favor, since it is one of the most showy and attractive of flowering plants. Of late years great improvement has been made in varieties of Pæonies. Almost all colors have been introduced, and many of the varieties have marked peculiarities, being as fragrant and beautiful as the rose.

Price and colors of Pæonies—Red, pink and pink and white, best varieties, strong roots, (that will flower the coming summer) 25c. each, \$2.50 per 12. Price of White Pæonies, strong roots, 35c. each.

GOLDEN GLOW.

Strong Plants, 5c. each, 50c. per 12.

Golden Glow.—This beautiful yellow blooming perennial plant was unknown to most people until a recent date. I know of no flowering plant that has attained such great popularity in so short a time. In order to be popular, a plant must be able to thrive in all localities without nursing and this is just what Golden Glow does. Like Phlox it stands out doors all winter. The foliage, which dies back every fall, springs up vigorously in the spring and grows to the height of 5 or 6 feet. If you do not wish the plants to grow so high, nip them off when they are a foot or two high, and they will branch out lower and be more desirable for certain localities. The blossoms appear in large numbers, hundreds of them on a single plant, and they succeed one another and remain long in bloom, giving the place an animated and brilliant appearance. Don't fail to plant Golden Glow.

Price of Golden Glow, strong plants, 5c. each, 50c. per dozen, by mail or express.

Dahlias make beautiful bouquets, and as they blossom in a bed, are remarkably attractive. **Price of strong Dahlia roots 15 cents each, \$1.50 per dozen.**

Gladiolus Bulbs—This is one of the best of the summer flowering bulbs. It is a flower anyone can grow.—**Price of Gladiolus Bulbs, fine mixed colors, 15c. per 6, 25c. per 12, \$1.10 per 100.**

GOLDEN GLOW PLANT IN FULL BLOOM.

PLANTS AND TREES BY MAIL.

(Safe Delivery Guaranteed.)

WE HAVE THOUSANDS of well pleased patrons who have received through the mails, postage paid, trees and plants from our nurseries.

WE HAVE THOUSANDS of apple trees, also peach and quince trees, and hundreds of thousands of currants, grapevines, raspberries, strawberries and other things suitable for mailing.

IN THE PACIFIC COAST STATES and in every distant state where trees can be grown will be found orchards and gardens planted with stock from our nurseries that were received by mail.

WE DO NOT OFFER as large an assortment by mail as we do by express and freight but OUR SPECIALTY this spring is APPLE TREES. Note the list on this page—varieties known to be good ones—good ones for home or commercial planting.

A SATISFACTORY FEATURE of the trees and plants by mail order is that the order can be filled with safety at any time during the winter or spring. Must you plant in January or February send your order and specify this when sending it and the order will be filled accordingly (except perhaps strawberries, these go later.)

WRITE US for prices if you need apples and other trees offered here by the hundred, or if there is anything that is not clear.

OUR APPLE TREES are first-class one year trees grown especially for the mailing orders. The list of varieties that we offer are as follows: American Blush, Green's Baldwin, Banana, Wisner's Dessert and Bismark.

The price of mailing size Apple Trees, each 15 cents; Dozen \$1.50, the buyer selecting the varieties needed.

DESCRIPTIONS of these varieties are found on pages 12, 13, 14, 15, 16, 17, 18, 19, 20, 21.

Apple Trees— Especially for mailing we have grown a grand block of one-year old apple trees. Such trees that every buyer will be pleased with, and such varieties that no fruit grower interested in

apples can afford to overlook. We offer the following varieties by mail: American Blush, Banana, Wisner's Dessert, Bismark, Green's Baldwin, Gano, a red winter apple, an improved Ben Davis, Grime's Golden, that great apple which Prof. Van Deman says is the best of all in quality, Jonathan, the great winter apple so popular all over the country, Rome Beauty, the reddish winter apple, and Winesap, the red winter apple so popular in the west and middle west and Ben Davis, the popular red winter apple.

Price, one year apple trees by mail postage paid by us, 15 cents each, \$1.50 per 12.

Grapes— We have a car load of nice grape vines of the following varieties, that can be sent by mail. Worden, Niagara, Brighton, Concord, Delaware and Moore's Early See pages 44 and 45.

Price of strong vines, 12c. each, \$1.25 per 12.

Peach Trees by Mail—

Not stunted trees, but first-class June budded, excellent in every way for long shipment and successful planting. We have mailed these in years past to valleys of the western mountains, and other distant sections, where their success has led to the planting of thousands of acres of trees in regions where it was not known that peach trees could be grown. We offer two varieties of mailing size peach trees.

Elberta, the most valuable yellow peach, fruit large, handsome, good quality.

Greensboro, a good, very early, white-fleshed, red-cheeked peach, hardy, productive and a favorite at Green's fruit farm.

Price of Elberta and Greensboro mailing size peach trees, 15c. each, \$1.50 per 12.

Strawberry Plants by Mail—

We mail many thousands every season. We can send you any of the following varieties as offered in body of catalogue: Corsican, Brandywine, Senator Dunlap and Pineapple flavored.

Price of Strawberry Plants, 25c. per 12, \$1.30 per 100.

GREEN'S SPECIAL MAIL COLLECTION OF APPLE TREES, ETC.

2 American Blush Apple, 2 Green's Baldwin Apple, 2 Banana Apple, 2 Elberta Peach, 2 Greensboro Peach, 2 Red Cross Currants, 1 Diploma Currant New, 10 Asparagus Plants. All for \$1.50 postpaid.

CURRENTS BY MAIL

DIPLOMA CURRENT

(NEW)

Late red current, largest of any variety that I have seen.
C. A. GREEN,

Price of Diploma Current, strong bushes, 10c. each

RED CROSS CURRENT

We grow it by the acre for home and market. We marketed \$1,085.00 worth off less than 2,000 bushes in three seasons.

Price of Red Cross Current, 5c. each, 60c. per 12, \$4.50 per 100, postpaid. See page 40.

A NEW RED RASPBERRY

SYRACUSE—Largest and best quality red berry in the world. See page 2 for illustration and description. Price \$1.00 each.

(Cuthbert), 5c. each, 50c. per 12, \$1.85 per 100.
Loudon Red Raspberry, 6c. each, 60c. per 12.

Red Ruby Raspberry (new), great, 60c per 12.

BLACK RASPBERRIES

Kansas, the best medium to late. Price 40c. per 12, postpaid.

BLACKBERRIES

Chas. A. Green Hardy Blackberry (new). Price 75c. per doz. Eldorado and Snyder, 65c. per doz., \$3.00 per 100 postpaid.

Perennial Phlox—I have for several years been propagating selections of Phlox. These brighten and beautify my grounds each year. You plant the roots and it blooms forever after, forming large clumps which can be separated and replanted.—C. A. GREEN.

Price of Perennial Phlox, assorted colors, 10c. each, 75c. per 12.

Sage—(Holt's mammoth)—Strong plants. 10c. each, \$1.00 per 12.

Live For Ever Rose—Hardy and Bug Proof. See last outside cover page for description and illustration and price for bushes by express or freight. This beats the world for a rose that needs no nursing yet blooms marvelously every year.

New Strawberry Cardinal—Largest size and of fine color and quality. It has no superior. Price of Cardinal, 50c. per 12, \$3 per 100. For other strawberries see page 47.

LIVE FOREVER ROSE
GROWN AS A HEDGE.

Live-Forever pink rose. Special Price of Live-Forever Rose, 2-years, 20c. each, \$2.00 per 12; 1-year, strong, 10c. each, \$1.00 per 12.

ROSES—The roses we offer are hardy, out-door grown. We offer a varied assortment, Red, Pink, White. We especially recommend Crimson Rambler, Magna Charter, Paul Neyron, Dorothy Perkins. Price of roses named above, 25c. each.

Gladiolus Bulbs—This is one of the best of the summer flowering bulbs. It is a flower anyone can grow. By making successive plantings the flowering season may be continued much longer than by planting the bulbs all at the same time. There is no limit to the range of color—pink, scarlet, yellow, crimson, white and a host of other colors.

Gladiolus Bulbs, mixed colors. Price, 15c. per 6, 25c. per 12, \$1.10 per 100.

Golden Glow—This beautiful and vigorous blooming perennial, which thrives in all localities. The blossoms appear in large numbers on single plants. See page 61.

Price of Golden Glow, strong plants, 5c. each.

Asparagus—We send many thousand by mail—never knew of a root being spoiled on way to the buyer.

Everyone who has a garden should have an asparagus bed.

Palmetto and Conover's Colossal, 25c. per 12, 95c. per 100.

Asparagus plant ready to set.

Rhubarb—10c. each, \$1.00 per 12.

Horse Radish—Sets 15c. each, 60c. per 1.00.

ONE YEAR OLD APPLE TREES FOR MAILING

Green's thrifty, well-rooted apple trees are 12 in. to 18 in. high, and can be sent safely by mail thousands of miles. **Price 15c. each.**

APPLES LIKE THESE CAN BE GROWN ON ONE
YEAR OLD APPLE TREES

Our varieties of one year old apple trees are as follows: **American Blush**, a large red winter apple of the finest quality, **Banana Apple**, a large yellow winter apple which has been sold in the Hood River District at \$12 per box or about \$1 each for the fruit, **Bismark**, a red fall or early winter apple that has attracted so much attention on account of its size and beauty, **Green's Improved Baldwin**, not surpassed as a bright red winter apple, **Gano**, a red winter apple, an improved **Ben Davis**, brighter in color and better in quality than **Ben Davis**, **Grime's Golden**, that great apple which Prof. Van Deman says is the best of all in quality, **Jonathan**, the great winter apple so popular all over the country, **Rome Beauty**, the reddish winter apple, and **Winesap**, the red winter apple so popular in the west and middle west.

These thrifty, well-rooted one year old apple trees have been popular with our patrons for many years, especially with those who live far away or who are not near railroads or express offices who desire the trees

to come by mail without any charge to the buyer for safe delivery.

These trees are not large enough to plant in an orchard unless protected by a stake and given cultivation. C. A. Green advises that these trees be planted 12 inches apart in a row in the garden where they are sure to live. Let them remain in the garden until they have attained the size desirable for planting in the field.

Do not confound these small thrifty trees with the small trees culled out of older trees. These trees are grown expressly for mailing and are bright, thrifty and such as cannot fail to grow when planted on your place. If you want a few apple trees for your garden you can plant these little trees in the spot where they are to remain, marking the place with a stake and giving the ground good cultivation.

Do not fail to place your order at the earliest possible moment for any kind of apple trees you may want, as apple trees are scarce this year all over the world. **Price of one year old apple trees 12 to 18 in. high, 15c. each, or \$1.50 per 12, delivered at your door, postage paid by Green.**

Price of Ostrich Plume (*Pampas Grass*) 10c. each by mail, postpaid.

ADDITIONAL LIST OF TREES OF MAILING SIZE

CHERRY TREES: Early Richmond, Montmorency, English Morello, Green's Tartarian, Governor Wood and Windsor. **Price, postage paid by us, 20c. each, \$2.00 per 12.**

PEACH TREES: Early Crawford, Late Crawford, Champion, Salway. **Price, postage paid by us, 15c. each, \$1.50 per 12.**

QUINCE TREES: Orange, Meech's, and Champion. **Price, postpaid by us, 20c. each, \$2.00 per 12.**

DWARF PEARS: Duchess, (only). **Price, postpaid by us, 20c. each, \$2.00 per 12.**

STD. PEARS: Bartlett, Kieffer, Anjou, Flemish Beauty, Seckel, Clapp's Favorite. **Price, postpaid by us, 20c. each, \$2.00 per 12.**

NUTS: Black Walnut. **Price, postpaid by us, 10c. each, \$1.00 per 12.**

SHADE TREES: Catalpa. **Price, postpaid by us, 10c. each, \$1.00 per 12.**

EVERGREENS: Norway Spruce. **Price 10c. each, \$1.00 per 12.**

If you want farm or orchard tools, spray pumps, spray mixtures, etc., send for *Green's Farm Tool Catalogue*. See advertisements on next pages.

THE LEVIN TREE AND GRAPE PRUNER

One of the strongest and easiest cutting pruning shears made, **Special price**, by mail, postpaid :

No. 23, medium size, 60 cents.

No. 24, large size, cut $\frac{3}{4}$ inch dry oak, 75c.

The Levin No. 24 is the most practical pruner made.

"FRUIT GROWERS' FAVORITE" PRUNING SAW

The Fruit Growers' Favorite Pruning Saw has a self feeding draw cut blade with a thin back that will not pinch or bind. It will cut limbs closer to the tree and will do three times the amount of work in a given time than any other saw on the market. All the work is done while standing on the ground, the handles being from 6 to 8 feet long. It is very light weight and a great labor saver. We know this saw to be the best on the market. Try it. Price \$1.50.

DOUBLE EDGE PRUNING SAW. Two in one, 75c. Postpaid \$1.00.

STANDARD TREE PRUNER

With Metal Brace Plate. Anti-Rust Rod, Steel Lever.

Standing on the ground the operator can cut from distance of arm's length to a height of 18 feet, according to the length of pole, the smallest twig or a branch an inch in diameter. Most convenient to use. Sure to do its work well.

If you want farm or orchard tools, spray pumps, spray mixtures, etc., send for Green's Farm Tool Catalogue. See advertisement on next page.

IMPROVED BRASS BARREL SPRAY PUMP

This pump is of a construction that is the best in all its parts. It is ready for operation when bolted to the staves of a barrel. The construction is such that the entire pump sets inside the barrel containing the liquid. It has brass ball valves and brass seats. Its plunger is brass fitted with hemp packing. The cylinder and discharge pipe are all of brass. Any kind of solution can be used in this pump. It will stand all kinds. The air chamber is 30 inches in length, enabling the pump to throw a uniform, constant and elastic spray. It is very powerful and easily operated. The Mechanical Agitator stirs the solution at the bottom, making it impossible for this pump to clog under any circumstances. There is nothing to get out of order.

Price No. 5, complete with Mechanical Agitator, 5 feet of three-ply discharge hose and nozzle ready to use, weight 30 lbs. ----- \$7.98

8-ft. Extension Pipe for higher trees ----- .60

FRUIT EVAPORATORS.

We have a complete line of Fruit Dryers, Bleachers, Presses, etc. Write for prices on whatever you need in this line. Every fruit grower should have an outfit for evaporating fruit. It pays well.

SENSIBLE WINE AND CIDER PRESS.

GREEN'S HOME EVAPORATOR.

Thoroughly tested and approved. Latest, cheapest, best. Can be used on any stove, dries any fruit.

Price \$6.00

Special Price, \$4.75

READ THIS: To introduce our Home Evaporator and our No. 1 Parer, Corer, and Slicer (see description at top of page), we offer **both** for only \$5.50. Weight less

than thirty pounds; can go by express or freight at very small cost. Just think of it! **A Parer, Corer and Slicer with a Fruit Evaporator, all for only \$5.50.**

YOU CANNOT AFFORD TO LOSE THIS OFFER.

Dear Sir—I found the Cook Stove Drier which I bought of you last fall just as represented and I think the world of it; it readily paid for itself last fall. I dried 400 pounds of dried apples with it and it did its work perfectly.

Yours respectfully,

CHARLES B. REES.

FRUIT, WINE AND JELLY PRESS

Three in one. Cleanest and best. The only one that separates juice, seeds and skins at one operation. For making wines, jellies and fruit butters from grapes, strawberries, black-

berries, gooseberries, currants, quinces, pineapples, etc. The dryness of the pulp may be regulated by thumb screw at the outlet. Weight only 15 lbs.

Special Price, complete, \$2.98.

The Best Spray Pumps made are sold by Green's Nursery Co. Send for our complete implement catalog containing everything for planting, spraying and marketing fruit.

GREEN'S POULTRY DEPARTMENT

COCKERELS, PULLETS, AND EGGS FOR HATCHING FOR SALE

Barred Plymouth Rocks—This breed is as solid as its name and is often called the "Farmer's Friend," the "All 'Round Fowl," the "Old Reliable." It is the bird for business, and deemed by many the best fowl for farm and home raising. It is not only a good layer, but is quick to develop for the early market. As a farsighted farmer once said to us, "When you kill one you've got something."

White Wyandotte—Is one of the handsomest fowls known; large size, good layers, and highly prized for its meat. The New York markets will, in time, more fully appreciate the value of the Wyandotte for its delicacy on the table of the epicure. It will be noticed that no breed has all the good qualities, therefore, if we want all the good qualities, we must have more than one breed; but surely no one can make a mistake in breeding the White Wyandotte, considering their beauty, egg laying propensities, and desirability in markets of the world.

WHITE WYANDOTTES

PRICE OF EGGS FOR HATCHING FOR ALL BREEDS

From good breeding pens \$1.00 per 13; from our best breeding pens \$2.00 per 13. While we do not guarantee the fertility of our eggs we are willing to replace all settings from which the purchasers receive less than six chicks, at half the price paid.

BARRED PLYMOUTH ROCKS

Single Comb Brown Leghorns—The acknowledged queen of the practical egg laying breeds is the Leghorn, when judged by the standard of the greatest number of marketable eggs produced at least cost. Not only are the hens persistent layers, but they are extremely active foragers and waste no time in setting. Like a good milch cow they put little fat upon their bones, but devote all surplus nourishment to steady production. They eat less than the heavy breeds, but whatever they consume is put to good purpose.

PRICE OF BIRDS OF ALL BREEDS

Cockerels \$2.00, \$3.00 and \$5.00 each; Pullets, \$2.00, \$2.50 and \$3.00 each; Trios, \$6.00, \$8.00 and \$10.00.

SINGLE COMB BROWN LEGHORNS

America's Greatest Fruit Magazine,

"GREEN'S FRUIT GROWER"

Are you a subscriber to Green's Fruit Grower, which I have been publishing for 25 years? If not, when sending in your order for trees add 25 cents to the sum to be sent us and I will accept it in full payment for one year's subscription to Green's Fruit grower without premium, which is just half the regular price. If you are already a subscriber, for this 25 cents we will send the Fruit Grower to any friend or relative you may desire.

CHAS. A. GREEN.

ROCHESTER, N. Y.**

THE LIVE-FOREVER HARDY, BUG PROOF ROSE

While visiting Green's Fruit Farm June 18th, I saw the finest of all exhibitions of roses. I doubt that there is one reader of Green's Fruit Grower who has ever seen such bloom and vigorous growth as was here exhibited. This is the Live-Forever Rose which the editor of Green's Fruit Grower has taken such delight in offering to the public.

C. A. Green has recommended these roses to many people who have given up rose culture after many experiments, finding it impossible for them to grow roses on account of winter killing or attacks by insects.

The peculiar feature of the Live-Forever Rose is that it grows many times more vigorously and blooms more profusely than any other variety. The busy farmer and fruit grower, who has no time to bother with poisonous sprays can succeed with it. And when once planted it will continue to bloom almost a lifetime.

As seen at Green's Fruit Farm these Live-Forever rose bushes were planted in rows, five feet apart between each row, in the rows 18 inches apart. In this rose hedge the plants stood regularly about 5 feet high from one end of the row to the other, a distance of nearly a thousand feet, presenting almost a solid mass of crimson bloom. Later these rose bushes turn almost white, which was the color when the photographs on this page were taken.

The foreman of Green's Fruit Farm who has been on this fruit farm for nearly twenty years was so delighted with the Live-Forever rose, from his experience of four years, he ordered 1000 bushes set aside for him to plant on his own place for a hedge row next spring.

It is a fact that many varieties of the roses are so slow and delicate in growth as to require the skill of an experienced rose grower to succeed with them. In contrast with these roses that can be grown with difficulty we have the Live-Forever rose which has never been known to winter kill and never known to be subdued by insects though not sprayed or given any special attention.

It begins to bloom the first year planted and the blossoms increase until the bushes are as thoroughly covered with the blossoms as are trees of the apple in full bloom.

We desire every reader to have a hedge row of Live-Forever roses running through his garden where it may be cultivated the same as a row of corn and grown as easily as a row of corn. I will make a special low price to anyone buying 100 or more of these plants for this purpose, as follows: One year rose bushes, \$1 for 12; 50 for \$4; 100 for \$8; 2 year old, 12 for \$1.25, 50 for \$5.

AMERICAN ELM.

This is considered the handsomest of all forest trees for the street or ornamental grounds. Green's reduced price for American Elm, 8 to 10 feet high, 35c each.
